*Horoscopes of Europe* - Marc Penfield 2006  
Horoscopes of Europe is Marc Penfield's third  
book on countries of the world arranged by  
continent. This encyclopedic book is the  
definitive work on the 51 nations that make up  
the world's smallest continent, from its largest  
(Russia) to four diminutive nations inside Italy,  
three of them shown here for the first time

(Montenegro, Seborga and Sov. Military Order  
of Malta). This extremely valuable reference  
work is one that no astrologer interested in  
mundane, or political, astrology can afford to be  
without. A century ago, Europe had only 26  
countries, most of them monarchies, only half of  
which remain today. Over the following eight  
decades, nine more nations were born and with  
the break-up of the Soviet Union, Czechoslovakia  
and Yugoslavia, 15 more countries emerged onto  
the world scene. Many countries have two  
horoscopes-one for its original monarchy, the  
other for its transition to democracy. France and  
Germany have many charts from their  
emergence in the Middle Ages down through a  
millennia to become the powerhouses of Europe.  
Charts for the Roman Republic and Empire are  
also shown. The Eurasian countries of the  
Caucasus have also been included as they  
straddle Europe and Asia as do the countries of  
Russia and Turkey. Charts for more than 135  
European cities have also been included,

calculated for when they were granted their charters. Appendix A has horoscopes for every member of the European Union, while Appendix B has the author's rectified birth times for most cities shown in this book. This appendix also has the author's speculative birth dates for the cities of London and Paris. Marc Penfield is a double Scorpio with Gemini rising. Known as an historian and researcher and a lover of history and geography, his many years as a travel agent enabled him to journey to many of the places he writes about. Marc Penfield is the author of *Bon Voyage* (on relocation techniques), *Solar Returns in Your Face*, *Stars over England* (with brief bios on its monarchs), *Horoscopes of the USA and Canada* (now in its 2nd printing), and *Horoscopes of Asia, Australia and the Pacific*.

**John J. Pershing and the American Expeditionary Forces in World War I,**

**1917-1919** - John T. Greenwood 2022-12-20

General of the Armies John J. Pershing (1860-1948) had a long and distinguished military career, but he is most famous for leading the American Expeditionary Forces in World War I. He published a memoir, *My Experiences in the World War*, and has been the

subject of numerous biographies, but the literature regarding this towering figure and his enormous role in the First World War deserves to be expanded to include a collection of his wartime correspondence. Meticulously edited by John T. Greenwood, volume 2 of *John J. Pershing and the American Expeditionary Forces in World War I, 1917-1919* covers the period of October 1 through December 31, 1917. During this time, Pershing focused his efforts on working with the French Ministry of War, the General Staff, and the field Army on training and equipping the AEF's few available combat divisions for frontline service. Russia's defection from the coalition and the surprising Italian defeat at Caporetto in October rocked the Allied ranks, and this volume addresses the creation of the Supreme War Council and the House's American War Mission—bodies that reexamined the Entente's military and diplomatic strategy and ultimately cemented the alliance. The correspondence also reveals how the House

Mission revived the divisive issue of amalgamating arriving American troops into existing British and French combat divisions—something that Pershing utterly opposed and saw as a threat to the AEF. The dispute never resolved and irritated British prime minister Lloyd George and French premier Georges Clemenceau so much that both would try to engineer Pershing's removal in the following year. Extracts from the large volume of rarely referenced cablegrams represent an important contribution to Pershing's wartime story.

*Fast Tanks and Heavy Bombers* - David E. Johnson 2013-02-15

The U.S. Army entered World War II unprepared. In addition, lacking Germany's blitzkrieg approach of coordinated armor and air power, the army was organized to fight two wars: one on the ground and one in the air.

Previous commentators have blamed Congressional funding and public apathy for the army's unprepared state. David E. Johnson believes instead that the principal causes were internal: army culture and bureaucracy, and their combined impact on the development of weapons and doctrine. Johnson examines the U.S. Army's innovations for both armor and aviation between the world wars, arguing that the tank became a captive of the conservative infantry and cavalry branches, while the airplane's development was channeled by air power insurgents bent on creating an independent air force. He maintains that as a consequence, the tank's potential was hindered by the traditional arms, while air power advocates focused mainly on proving the decisiveness of strategic bombing, neglecting the mission of tactical support for ground troops. Minimal interaction between ground and air officers resulted in insufficient cooperation between armored forces and air forces. Fast

Tanks and Heavy Bombers makes a major contribution to a new understanding of both the creation of the modern U.S. Army and the Army's performance in World War II. The book also provides important insights for future military innovation.
