

Assessing Maritime Power In The Asia Pacific The Impact Of American Strategic Re Balance Corbett Centre For Maritime Policy Studies

This is likewise one of the factors by obtaining the soft documents of this **Assessing Maritime Power In The Asia Pacific The Impact Of American Strategic Re Balance Corbett Centre For Maritime Policy Studies** by online. You might not require more time to spend to go to the book initiation as capably as search for them. In some cases, you likewise attain not discover the message Assessing Maritime Power In The Asia Pacific The Impact Of American Strategic Re Balance Corbett Centre For Maritime Policy Studies that you are looking for. It will totally squander the time.

However below, similar to you visit this web page, it will be appropriately unconditionally simple to get as skillfully as download lead Assessing Maritime Power In The Asia Pacific The Impact Of American Strategic Re Balance Corbett Centre For Maritime Policy Studies

It will not acknowledge many epoch as we notify before. You can reach it while play something else

at home and even in your workplace. for that reason easy! So, are you question? Just exercise just what we provide below as skillfully as evaluation **Assessing Maritime Power In The Asia Pacific The Impact Of American Strategic Re Balance Corbett Centre For Maritime Policy Studies** what you past to read!

Indian Ocean Region - Manoj Gupta

2010-08-09

It is a privilege to introduce the reader to this book, as I believe that it will make a significant contribution to, given the difficulties in the knowledge of the Indian Ocean, developing cooperation in the Indian Ocean region. There have been numerous failed efforts at regional cooperation in different fora in the Indian Ocean. As a result of the land-based orientation of the people in the region, the importance for countries to develop the power to govern the sea has largely been ignored. The maritime approach taken by Manoj Gupta to the Indian Ocean as a region in international relations offers a timely and critical assessment of the

potential for regional cooperation and ocean governance. The political leadership in the region can no longer ignore the need for cooperation in maritime affairs in the Indian Ocean. This book enriches the literature on Indian Ocean issues as it argues convincingly that the security of nations, economic well-being of the people and health of the Indian Ocean cannot be divested from one another. All are fundamentally dependant on the ability of the countries in the region to individually and collectively exert the power to govern the sea.

Strategic Asia 2013-14 - Ashley J. Tellis

2013-09-25

The 2013-14 Strategic Asia volume examines the role of nuclear weapons in the grand strategies

of key Asian states and assesses the impact of these capabilities—both established and latent—on regional and international stability. In each chapter, a leading expert explores the historical, strategic, and political factors that drive a country's calculations vis-a-vis nuclear weapons and draws implications for American interests.

Australia and Asia-Pacific Regional Security - Peter Jennings 1992

Maritime Power in the Black Sea - Deborah Sanders 2016-05-13

Maritime Power in the Black Sea provides the first comprehensive assessment and evaluation of the comparative maritime power of the six littoral states in the Black Sea - Turkey, Russia, Ukraine, Georgia, Romania and Bulgaria. This book examines the maritime capabilities and assets of each of the six littoral Black Sea states and also considers the implications of the distribution of maritime power on both regional

and international security. As such it makes an important contribution to the debate about what constitutes maritime power in the twenty first century and provides a thematic comparative study of the ability of each of the littoral states of the Black Sea to project maritime power.

Asian Maritime Power in the 21st Century - Vijay Sakhujia 2011-01

Maritime power has been a key defining parameter of economic vitality and geostrategic power of nations. This book explores how the first decade of the 21st century has witnessed the rise of China and India as confident economic powers pivoting on high growth rates, exponential expansion of science, technology and industrial growth.

Assessing China's Naval Power - Sarah Kirchberger 2015-06-23

This book analyzes the rise of China's naval power and its possible strategic consequences from a wide variety of perspectives - technological, economic, and geostrategic -

while employing a historical-comparative approach throughout. Since naval development requires huge financial resources and mostly takes place within the context of transnational industrial partnerships, this study also consciously adopts an industry perspective. The systemic problems involved in warship production and the associated material, financial, technological, and political requirements currently remain overlooked aspects in the case of China. Drawing on first-hand working experience in the naval shipbuilding industry, the author provides transparent criteria for the evaluation of different naval technologies' strategic value, which other researchers can draw upon as a basis for further research in such diverse fields as International Security Studies, Naval Warfare Studies, Chinese Studies, and International Relations.

Burma's Order of Battle - Andrew Selth 2000

Rivalry and Response - Jonathan R. Stromseth
2021-02-16

Southeast Asia has become a hotbed of strategic rivalry between China and the United States. China is asserting its influence in the region through economic statecraft and far-reaching efforts to secure its sovereignty claims in the South China Sea, while the United States has promoted a Free and Open Indo-Pacific strategy that explicitly challenges China's expanding influence—warning other countries that Beijing is practicing predatory economics and advancing governance concepts associated with rising authoritarianism in the region. In this timely volume, leading experts from Southeast Asia, Australia, and the United States assess these great power dynamics by examining the strategic landscape, domestic governance trends, and economic challenges in Southeast Asia, with the latter focusing especially on infrastructure. Among other findings, the authors express concern that U.S. policy has

become too concentrated on defense and security, to the detriment of diplomacy and development, allowing China to fill the soft power vacuum and capture the narrative through its signature Belt and Road Initiative. The COVID-19 pandemic has only increased the policy challenges for Washington as China recovers faster from the outbreak, reinforcing its already advantaged economic position and advancing its strategic goals as a result. As the Biden administration begins to formulate its strategy for the region, it would do well to consider these findings and the related policy recommendations that appear in this volume. Much is at stake for U.S. foreign policy and American interests. Southeast Asia includes two U.S. allies—Thailand and the Philippines—important security partners like Singapore, and key emerging partners such as Vietnam and Indonesia. Almost 42,000 U.S. companies export to the 10 countries that comprise the Association of Southeast Asian

Nations (ASEAN), supporting about 600,000 jobs in the United States, but America's economic standing is increasingly at risk.

[India as an Asia Pacific Power](#) - David Brewster
2012-03-12

"This book provides a comprehensive assessment of India's international relations in the Asia Pacific region. It charts the development of India's increasingly important role as a major world power, discusses India's international relations strategy and examines India's relationship with each of the major countries of East and Southeast Asia."--
Publisher's description

Organised Crime and Terrorism in the Asia-Pacific Region - John McFarlane 2002

Focusing the CSBM Agenda in the Asia/Pacific Region - Paul Dibb 1992

The Remaking of Asia's Geopolitics - Paul Dibb 1998

Foundations of National Power in the Asia-Pacific - Ashley J. Tellis 2015

Maritime Security in the Indo-Pacific - Mohan Malik 2014-09-24

"Maritime Security in the Indo-Pacific opens by introducing the Indo-Pacific and outlining the roles of China, India, and the United States in various maritime issues in the region. This volume develops common approaches by focusing on geopolitical challenges, transnational security concerns, and multilateral institution-building and cooperation"--Provided by publisher.

Asia-Pacific - David Lai 2013

Dr. David Lai provides a timely assessment of the geostrategic significance of Asia-Pacific. His monograph is also a thought-provoking analysis of the U.S. strategic shift toward the region and its implications. Dr. Lai judiciously offers the following key points. First, Asia-Pacific, which covers China, Northeast Asia, and Southeast

Asia, is a region with complex currents. On the one hand, there is an unabated region-wide drive for economic development that has been pushing Asia-Pacific forward for decades. On the other, this region is troubled with, aside from many other conflicts, unsettled maritime disputes that have the potential to trigger wars between and among Asia-Pacific nations. Second, on top of these mixed currents, China and the United States compete intensely over a wide range of vital interests in this region. For better or for worse, the U.S.-China relationship is becoming a defining factor in the relations among the Asia-Pacific nations. Third, the U.S. strategic shift toward Asia-Pacific is, as President Obama puts it, not a choice but a necessity. Although conflicts elsewhere, especially the ones in the Middle East, continue to draw U.S. attention and consume U.S. foreign policy resources, the United States is turning its focus toward China and Asia-Pacific. Fourth, in the mid-2000s, the United States and China made an unprecedented

strategic goodwill exchange and agreed to blaze a new path out of the tragedy that often attends great power transition. Fifth, at this time of U.S. strategic reorientation and military rebalancing toward Asia-Pacific, the most dangerous consideration is that Asia-Pacific nations having disputes with China can misread U.S. strategic intentions and overplay the ‘U.S. card’ to pursue their territorial interests and challenge China. Finally, territorial dispute is becoming an urgent issue in the Asia-Pacific.

Korean Sea Power and the Pacific Era - Dalchoong Kim 1990

Strategic Assessment 1999 - 1999

India and Japan - Rajesh Basrur 2018-03-21
This volume focuses on the rapidly expanding strategic relationship between India and Japan, expanding on the hitherto under-analyzed concept of “strategic partnership,” tracing the history of the interaction, and gauging its

current and future trajectories. The rise of China and its challenge to U.S. dominance of the global system is the setting in which the partnership has assumed a major profile, incorporating both defence and economic cooperation on an unprecedented scale. The increasing congruence of Indian and Japanese interests is juxtaposed with the inherent limitations of the partnership to portray a complex picture of a kind of strategic relationship that has become a staple of contemporary international politics.

Power and the Maritime Domain - Greg Kennedy 2022-10-28

This book offers a multi-disciplinary and multi-national approach to defining key elements required to define power within the maritime domain. The volume engages with the concept that the maritime domain is a multi-dimensional space embracing oceans, seas, waterways, including all elements of maritime power, related activities, infrastructure, resources and assets. It illustrates the complexity and

interconnectivity of the factors that contribute to the appreciation, creation, and application of maritime power. In practical terms, the book highlights that the maritime domain is a continuum that interconnects countries, cultures, politics, economics, trade, environment, knowledge, and technological power globally. Perhaps most importantly, the maritime domain generates power of its own volition, as well as acting as a critical enabler for the creation of other types of nations power: economic, political, military, technological, intelligence and fiscal power, in particular. The book not only brings those various factors to the reader's attention but, in the synthesis, also clarifies the connections between the various elements in creating a greater maritime whole. This book will be of great interest to students of maritime security, strategic studies and International Relations.

Taiwan's New Role in the Asia-Pacific Region - Gary Klintworth 1992

Maritime Challenges and Priorities in Asia - Joshua Ho 2012

Maritime issues are particularly important for Asian countries, where there is a high reliance on shipping routes for international trade, many difficult disputes over maritime boundaries, and the prospect of increasing tensions where maritime power might play a significant role. This book uses contributions by 17 experts to build a comprehensive survey of the maritime issues affecting Asia. It discusses the issues overall, goes on to examine the issues from the perspective of each of 14 key countries, and concludes by assessing the prospects for resolving common problems in order to preserve good order at sea.

China's Global Engagement - Jacques deLisle 2017-05-30

Assessing China's rapidly changing role on the international stage China is again undergoing a period of significant transition. Internally, China's leaders are addressing challenges to the

economy and other domestic issues after three decades of dramatic growth and reforms. President Xi Jinping and other leaders also are refashioning foreign policy to better fit what they see as China's place in the world. This has included a more proactive approach to trade and related international economic affairs, a more vigorous approach to security matters, and a more focused engagement on international cultural and educational affairs. In this volume, China specialists from around the world explore key issues raised by a changing China's interaction with a changing world. They chronicle China's emergence as a more capable actor whose engagement is reshaping international affairs in many dimensions. These include: global currency and trading systems; patterns of cooperation and competition in technological innovation; economic and political trends in the developing world; the American-led security order in the Asia-Pacific region; the practice of international military and

humanitarian intervention; the use of naval power; the role of international law in persistent territorial and maritime disputes in the East and South China Seas; the international human rights regime; the circulation of Chinese talent trained abroad; a more globalized film industry; and programs to reshape global cultural awareness about China through educational initiatives. Across these diverse areas, China's capacity—and desire—to influence events and outcomes have risen markedly. The results so far are mixed, and the future trajectory remains uncertain. But across the wide range of issues addressed in this book, China has become a major and likely an enduring participant.

Red Star over the Pacific, Revised Edition - Toshi Yoshihara 2018-12-15

This is an assessment of how the rise of Chinese seapower will affect U.S. maritimes strategy in Asia.

[Explaining Contemporary Asian Military Modernization](#) - Sheryn Lee 2021-04-20

This book proposes a novel theoretical framework of "interactive arming" in order to explain armament dynamics in contemporary Asia. Frequently, the modernisation of contemporary naval forces in Asia is described as an "arms race," with the underlying assumption being that weapons acquisitions and increases in defence expenditure are competitive and bilateral and due to conflicting purposes or mutual fears. This book argues that the concept of an arms race is an unsuitable one for explaining contemporary military modernisation in 21st-century Asia. Instead, it proposes a novel and innovative concept of "interactive arming" and argues that what drives conflict is political rivalry, not weapons acquisitions. Instead of perceiving arming as abnormal behaviour, the book views arming as a natural strategic behaviour of states and military modernisation as a basic requirement for a state's ability to survive. This book will be of much interest to students of Asian security, strategic studies and

international relations in general.

Building Up the Buildup - J. Marshall Beier 2000

Russia and the Asia-Pacific Region - Leszek Buszynski 1992

Assessing Maritime Power in the Asia-Pacific - Greg Kennedy 2016-03-09

Leading academics from around the world, who specialize in analysing maritime strategic issues, deliberate the impact of the American 'pivot' or 're-balance' strategy, and the 'Air-Sea Battle' operational concept, on the maritime power and posture of a number of selected states. Intending to strengthen US economic, diplomatic, and security engagement throughout the Asia-Pacific, both bilaterally and multilaterally, the re-balance stands out as one of the Obama administration's most far-sighted and ambitious foreign policy initiatives.

Security Politics in the Asia-Pacific - William T. Tow 2009-10-15

Asia is experiencing major changes in its security relations. This book brings together respected experts to assess both the theoretical and empirical dimensions of the Asian security debate. Building on the latest research on Asia's regional security politics, it focuses on the 'regional-global nexus' as a way to understand the dynamics of Asian security politics and its intersection with global security. Contributors to the volume offer diverse but complementary perspectives on which issues and factors are most important in explaining how security politics in Asia can be interpreted at both the regional and global levels of analysis. Issues addressed include power balancing and alliances, governance and democracy, maritime and energy security, the relationship between economics and security, 'human security', terrorism, nuclear non-proliferation, climate change and pandemics. This work will serve as a standard reference on the evolution of key issues in Asian security.

Assessing Maritime Power in the Asia-Pacific - Professor Greg Kennedy 2015-11-28
Leading academics from around the world, who specialize in analysing maritime strategic issues, deliberate the impact of the American 'Pivot' or 'Re-Balance' strategy, and the 'Air-Sea Battle' Operational concept, on the maritime power and posture of a number of selected states. Intending to strengthen US economic, diplomatic, and security engagement throughout the Asia-Pacific, both bilaterally and multilaterally, the re-balance stands out as one of the Obama administration's most far-sighted and ambitious foreign policy initiatives.

The Council for Security Cooperation in the Asia Pacific (CSCAP) - Desmond Ball 2000

[The Evolving Maritime Balance of Power in the Asia-Pacific](#) - Lawrence W. Prabhakar 2006
The Asia-Pacific region has emerged as the hub of global geo-political, geo-economic and geo-strategic significance in the post-Cold War

period. The rise of China and the resurgence of India will be the hallmark for the next 50 years. How this surge in power is accommodated by the incumbent powers like the United States and Japan, and how the new regional powers like China and India manage the power politics that emerge will be the key determinants of regional stability. This volume examines the national maritime doctrines as well as the nuclear weapons developments at sea of the four major powers in the Asia-Pacific, namely, China, India, Japan and the United States, to see if the evolving dynamic is a cooperative or a competitive one. In particular, the volume looks at the evolving paradigms of maritime transformation in strategy and technology; the emergent new maritime doctrines and evolving force postures in the naval orders of battle; the role and operations of nuclear navies in the Asia-Pacific; and the implications and impact of nuclear weapons, ballistic missiles and sea-based missile defence responses in the region.

Future of Regional Cooperation in Asia and the Pacific - Bambang Susantono 2020-11-01

This book reviews progress with regional cooperation and integration in Asia and the Pacific and explores how it can be reshaped to achieve a more resilient, sustainable, and inclusive future. Consisting of papers contributed by renowned scholars and Asian Development Bank staff, the book covers four major areas: public goods, trade and investment, financial cooperation, and regional health cooperation. The book emphasizes how the region can better leverage regional integration to realize its vast potential as well as overcome challenges such as the coronavirus disease (COVID-19) pandemic.

By More Than Providence - Michael J. Green
2017-03-21

Soon after the American Revolution, certain of the founders began to recognize the strategic significance of Asia and the Pacific and the vast material and cultural resources at stake there.

Over the coming generations, the United States continued to ask how best to expand trade with the region and whether to partner with China, at the center of the continent, or Japan, looking toward the Pacific. Where should the United States draw its defensive line, and how should it export democratic principles? In a history that spans the eighteenth century to the present, Michael J. Green follows the development of U.S. strategic thinking toward East Asia, identifying recurring themes in American statecraft that reflect the nation's political philosophy and material realities. Drawing on archives, interviews, and his own experience in the Pentagon and White House, Green finds one overarching concern driving U.S. policy toward East Asia: a fear that a rival power might use the Pacific to isolate and threaten the United States and prevent the ocean from becoming a conduit for the westward free flow of trade, values, and forward defense. By More Than Providence works through these problems from the

perspective of history's major strategists and statesmen, from Thomas Jefferson to Alfred Thayer Mahan and Henry Kissinger. It records the fate of their ideas as they collided with the realities of the Far East and adds clarity to America's stakes in the region, especially when compared with those of Europe and the Middle East.

Red Star Over the Pacific - Toshi Yoshihara
2010

Two associate professors of strategy at the Naval War College assess how the rise of Chinese sea power will affect the United States maritime strategy in Asia and discuss the sea-power theories of Alfred Thayer Mahan, now popular in China.

Alliances, Alignments and the Global Order -
Paul Dibb 1997

Strategic Assessment ... -

Asia-Pacific Regional Security Assessment

2020 - The International Institute for Strategic Studies (IISS) 2020-06-03

The Asia-Pacific Regional Security Assessment provides insight into key regional strategic, geopolitical, economic, military and security topics. Among the topics explored are: the deteriorating US-China relationship and great-power competition; US alliances and security partnerships; the collapse of the Intermediate-range Nuclear Forces Treaty; diplomatic gridlock on the Korean Peninsula; Japan's role in Indo-Pacific security; the breakdown in Japan-South Korea relations; Indonesian policy towards the South China Sea; Australia's defence and security outlook; the European security role in Asia. Authors include leading regional analysts and academics Douglas Barrie, William Choong, Aaron Connelly, Andrew Davies, Michael Elleman, Bonnie S. Glaser, Euan Graham, Christopher W. Hughes, Meia Nouwens, Brendan Taylor and William Tow.

Assessing the Asia-Pacific Rebalance - David

J. Berteau 2014-12-22

This report seeks to clarify the stated objectives of the US rebalance strategy, reviewing regional responses, and assessing the status of the rebalance, which is critical to reinforcing regional stability by strengthening US relationships, presence, and capabilities.

Asian Maritime Strategies - Bernard Cole
2013-10-15

This book is concerned with both the national security concerns of Asian maritime nations and the security of the Asian maritime commons. These are defined as the Pacific and Indian Oceans and associated seas, bays, and gulfs, with their included sea lines of communication (SLOCs). The most useful geographical designation for maritime Asia is the "Indo-Pacific." Bernard Cole provides both a survey of the maritime strategies of the primary nations of the Indo-Pacific region and an evaluation of the domestic and international politics that drive those strategies. The United States, Canada,

Russia, Japan, North Korea, South Korea, China, the Philippines, Brunei, Indonesia, Vietnam, Singapore, Malaysia, Myanmar, India, Pakistan, Iran, the smaller Indian Ocean and Persian Gulf states are all surveyed and analyzed. The United States, Japan, China, and India not surprisingly draw the most attention, given their large modern navies and distant strategic reach. The author concludes that the United States remains the dominant maritime power in this huge region, stretching from Canada to the Persian Gulf, despite its lack of a traditionally strong merchant marine. U.S. maritime power remains paramount, due primarily to its dominant navy. The Chinese naval modernization program deservedly receives a good deal of public attention, but Cole argues that on a day-to-day basis the Japanese Maritime Self-Defense Force, as its navy is named, is the most powerful maritime force in Far Eastern waters, while the modernizing Indian Navy potentially dominates the Indian Ocean. In fact, a focus of this work is

the exemplary description of all the region's navies, with the author noting the naval arms race that is underway, particularly in the area of submarine acquisition. Cole is careful to couch this phenomenon in the regional concerns about Chinese naval expansion and the desire to ensure a continued, massive U.S. naval presence. The current naval developments in the region evince elements of a naval arms race, but lack the coherent maritime strategies to make naval developments dangerous to regional peace and security. Most telling will be whether United States power and focus remain on the region, while adjusting to continued Chinese maritime power in a way acceptable to both nations. No other current or recent work provides such a complete description of the Indo-Pacific region's navies and maritime strategies, while analyzing the current and future impact of those forces. *Asia-Pacific Regional Security Assessment 2021* - The International Institute for Strategic Studies (IISS) 2021-06-08

The Asia-Pacific Regional Security Assessment 2021 provides insight into key regional strategic, geopolitical, economic, military and security topics. Among the topics explored are: US–China decoupling and its regional security implications; Japan’s security policy and China; India’s emerging grand strategy; Southeast Asia amid rising great-power rivalry; Australia’s new regional security posture; NATO’s evolving

approach to China; The United Kingdom’s ‘tilt’ to the Indo-Pacific; and Emerging technologies and future conflict in the Asia-Pacific. Authors include leading regional analysts and academics Kanti Bajpai, Gordon Flake, Franz-Stefan Gady, Prashanth Parameswaran, Alessio Patalano, Samir Puri, Sarah Raine, Tan See Seng, Drew Thompson, Ashley Townshend, Joanne Wallis and Robert Ward.
