The Souls of Black Folk - W. E. B. Du Bois 2020-01-14

The Souls of Black Folk is a 1903 work of American literature by W. E. B. Du Bois. It is a seminal work in the history of sociology and a cornerstone of African-American literature. The book contains several essays on race, some of which the magazine Atlantic Monthly had previously published. To develop this work, Du Bois drew from his own experiences as an African American in American society. Outside of its notable relevance in African-American history, The Souls of Black Folk also holds an important place in social science as one of the early works in the field of sociology. In The Souls of Black Folk, Du Bois used the term "double consciousness", perhaps taken from Ralph Waldo Emerson ("The Transcendentalist" and "Fate"), applying it to the idea that black people must have two fields of vision at all times. They must be conscious of how they view themselves, as well as being conscious of how the world views them.

The text continues to offer a superb thematic organization together with practical applications and examples that help students see beyond research to big-picture concepts. Often described as a challenging book that is easy to learn from, the book surveys psychology's broad range of content with three aims: to illuminate the process of research and its relationship to application, to show both the unity and diversity of psychology's subject matter, and to help students master the basic concepts and principles of psychology with as little struggle as possible.
