Democracy and Crisis - Benjamin Isakhan 2014-05-30

Recent years have seen near constant reports on the failures of governance and the crisis of democracy. The critical nexus between the ever-increasing array of crises that modern representative democracies face and the widening reliance on an array of undemocratic governance mechanisms and networks to meet and manage these crises needs urgent and in-depth scholarly attention. This book therefore seeks to investigate the ways in which

representative democracy might better handle environmental, political, social and economic crises in the twenty-first century by making the mechanisms of governance more democratic. By examining cases such as the global financial crisis, the arab revolutions, Wikileaks and climate change, this volume highlights the tensions between governance and democracy during times of crisis and examines the prospects of democratising governance in the twenty-first century and beyond.

Recomposing Eco-poetics - Lynn Keller 2018-01-16

In the first book devoted exclusively to the eco-poetics of the twenty-first century, Lynn Keller examines poetry of what she terms the "self-conscious Anthropocene," a period in which there is widespread awareness of the scale and severity of human effects on the planet.

Recomposing Eco-poetics analyzes work written since the year 2000 by thirteen North American poets--including Evelyn Reilly, Juliana Spahr, Ed Roberson, and Jena Osman--all of whom push the bounds of literary convention as they seek forms and language adequate to complex environmental problems. Drawing as often on linguistic experimentalism as on traditional literary resources, these poets respond to environments transformed by people and take "nature" to be a far more inclusive and culturally imbricated category than conventional nature poetry does. This interdisciplinary study not only brings cutting-edge work in ecocriticism to bear on a diverse archive of contemporary environmental poetry; it also offers the environmental humanities new ways to understand the cultural and affective dimensions

of the Anthropocene.

The Politics of Time - Peter Osborne 1995

If Aristotle sought to understand time through change, might we not reverse the procedure and seek to understand change through time? Once we do this, argues Peter Osborne, it soon becomes clear that ideas such as avant-garde, modern, postmodern and tradition—which are usually only treated as markets for empirically discrete periods, movements or styles—are best understood as categories of historical totalization. More specifically, Osborne claims, such ideas involve distinct "temporalizations" of history, giving rise to conflicting politics of time. His book begins with a consideration of the main aspects of modernity and develops through a series of critical engagements with the major twentieth-century positions in the philosophy of history. He concludes with a fascinating history of the avant-garde intervention into the temporality of everyday life in surrealism, the situationists and the work of Henri Lefebvre.

Compasito - Nancy Flowers 2007-01-01

Living among other people, in their families and communities, children become aware from a very early age of questions related to justice, and they search for the meaning of the world. By fostering an understanding of human rights, shaping opinion and developing attitudes, human rights education strongly supports this natural interest and learning process. This is what human rights education is about and this is what 'Compasito manual on human rights education for children' is for. 'Compasito' is a starting point for educators, teachers and trainers who are ready to deal with human rights education with children of 7-13 years. The book covers the key concepts of human rights and children's rights, and provides substantial theoretical background to 13 key human rights issues, such as democracy, citizenship, gender equality, environment, media, poverty, and violence. The 42 practical activities serve to engage and motivate children to recognise human rights issues in their own environment. They help children to develop critical thinking, responsibility and a sense of justice, and help them learn how to take action to contribute to the betterment of their school or community. The manual also gives practical tips on how it can be used in various formal and non-formal

educational settings.

Composing the Party Line - David G. Tompkins 2013-10-15

This book examines the exercise of power in the Stalinist music world as well as the ways in which composers and ordinary people responded to it. It presents a comparative inquiry into the relationship between music and politics in the German Democratic Republic and Poland from the aftermath of World War II through Stalin's death in 1953, concluding with the slow process of de-Stalinization in the mid-to late-1950s. The author explores how the Communist parties in both countries expressed their attitudes to music of all kinds, and how composers, performers, and audiences cooperated with, resisted, and negotiated these suggestions and demands. Based on a deep analysis of the archival and contemporary published sources on state, party, and professional organizations concerned with musical life, Tompkins argues that music, as a significant part of cultural production in these countries, played a key role in instituting and maintaining the regimes of East Central Europe. As part of the Stalinist project to create and control a new socialist identity at the personal as well as collective level, the ruling parties in East Germany and Poland sought to saturate public space through the production of music. Politically effective ideas and symbols were introduced that furthered their attempts to, in the parlance of the day, "engineer the human soul." Music also helped the Communist parties

establish legitimacy. Extensive state support for musical life encouraged musical elites and audiences to accept the dominant position and political missions of these regimes. Party leaders invested considerable resources in the attempt to create an authorized musical language that would secure and maintain hegemony over the cultural and wider social worlds. The responses of composers and audiences ran the gamut from enthusiasm to suspicion, but indifference was not an option.

Construction 4.0 - Anil Sawhney 2020

Modelled on the concept of Industry 4.0, the idea of Construction 4.0 is based on a confluence of trends and technologies that promise to reshape the way built environment assets are designed, constructed, and operated. With the pervasive use of Building Information Modelling (BIM), lean principles, digital technologies, and offsite construction, the industry is at the cusp of this transformation. The critical challenge is the fragmented state of teaching, research, and professional practice in the built environment sector. This handbook aims to overcome this fragmentation by describing Construction 4.0 in the context of its current state, emerging trends and technologies, and the people and process issues that surround the coming transformation. Construction 4.0 is a framework that is a

confluence and convergence of the following broad themes discussed in this book: Industrial production (prefabrication, 3D printing and assembly, offsite manufacture) Cyber-physical systems (actuators, sensors, IoT, robots, cobots, drones) Digital and computing technologies (BIM, video and laser scanning, AI and cloud computing, big data and data analytics, reality capture, Blockchain, simulation, augmented reality, data standards and interoperability, and vertical and horizontal integration) The aim of this handbook is to describe the Construction 4.0 framework and consequently highlight the resultant processes and practices that allow us to plan, design, deliver, and operate built environment assets more effectively and efficiently by focusing on the physical-to-digital transformation and then digital-to-physical transformation. This book is essential reading for all built environment and AEC stakeholders who need to get to grips with the technological transformations currently shaping their industry, research, and teaching.

El Hadji Sy - Clémentine Deliss 2015-03-05

El Hadji Sy is one of the most significant figures in African contemporary art. Since the late 1970s, the Senegalese artist and curator has helped shape the country's thriving art scene through his innovative painting and performance art. But El Sy is also an internationally recognized activist, having founded the collectives Laboratoire Agit-Art and Tenq, which aim to create contemporary art that engages with the country's pressing social and political issues. The first comprehensive publication on El Sy, this book places the artist's work in the context of activism in Senegal since the country

gained independence from France in 1960.

Included are critical essays by Hans Belting, Elvira Dyangani Ose, and Pablo Lafuente who explore post-independence aesthetics and the effect of postwar relations between Germany and Senegal. The critical essays are supplemented with copious illustrations from the artist's archive—many never before seen—offering rare insight into the African art before the Global Turn of 1989.

The German-Jewish Experience Revisited -

Steven E. Aschheim 2015-09-14

In the past decades the "German-Jewish phenomenon" (Derrida) has increasingly attracted the attention of scholars from various fields: Jewish studies, intellectual history, philosophy, literary and cultural studies, critical theory. In all its complex dimensions, the post-enlightenment German-Jewish experience is overwhelmingly regarded as the most quintessential and charged meeting of Jews with the project of modernity. Perhaps for this reason, from the eighteenth century through to our own time it has been the object of intense reflection, of clashing interpretations and appropriations. In both micro and macro case-studies, this volume engages the multiple perspectives as advocated by manifold interested actors, and analyzes their uses, biases and ideological functions over time in different cultural, disciplinary and national contexts. This volume includes both historical treatments of differing German-Jewish understandings of their experience - their relations to their Judaism, general culture and to other Jews - and contemporary reflections and competing interpretations as to how to understand the overall experience of German Jewry.

The Justice Motive in Everyday Life - Michael Ross 2002-02-11

This book contains essays in honour of Melvin J. Lerner, a pioneer in the psychological study of justice. The contributors to this volume are internationally renowned scholars from psychology, business, and law. They examine the role of justice motivation in a wide variety of contexts, including workplace violence, affirmative action programs, helping or harming innocent victims and how people react to their own fate. Contributors explore fundamental issues such as whether people's interest in justice is motivated by self-interest or a genuine concern for the welfare of others, when and why people feel a need to punish transgressors, how a concern for justice emerges during the development of societies and individuals, and the relation of justice motivation to moral motivation. How an understanding of justice motivation can contribute to the amelioration of major social problems is also examined.

Exploiting Semantic Web Knowledge Graphs in Data Mining - P. Ristoski 2019-06-28

Data Mining and Knowledge Discovery in Databases (KDD) is a research field concerned with deriving higher-level insights from data. The tasks performed in this field are knowledge intensive and can benefit from additional knowledge from various sources, so many approaches have been proposed that combine Semantic Web data with the data mining and knowledge discovery process. This book, *Exploiting Semantic Web Knowledge Graphs in Data Mining*, aims to show that Semantic Web knowledge graphs are useful for generating valuable data mining features that can be used in various data mining tasks. In Part I, *Mining Semantic Web Knowledge Graphs*, the author evaluates unsupervised feature generation strategies from types and relations in knowledge graphs used in different data mining tasks such as classification, regression, and outlier detection. Part II, *Semantic Web Knowledge Graphs Embeddings*, proposes an approach that circumvents the shortcomings introduced with the approaches in Part I, developing an approach that is able to embed complete Semantic Web knowledge graphs in a low dimensional feature space where each entity and relation in the knowledge graph is represented

as a numerical vector. Finally, Part III, *Applications of Semantic Web Knowledge Graphs*, describes a list of applications that exploit Semantic Web knowledge graphs like classification and regression, showing that the approaches developed in Part I and Part II can be used in applications in various domains. The book will be of interest to all those working in the field of data mining and KDD.

Scorch - A. D. Nauman 2001-11-20

In the future world of Scorch, America is run by a “corporacracy.” Three conglomerates have taken control not by force but by manipulating common beliefs and values through the media, and particularly by playing on Americans’ fears of Big Brother. Consumerism and privatization have run amok in this landscape of flashing screens and subtle brainwashing, a world where even city streets and public schools are run by big business. This is a darkly comic first novel of a dystopian future, with echoes of 1984 and Brave New World.

The Revised Fundamentals of Caregiving - Jonathan Evison 2013-05-07

In The Revised Fundamentals of Caregiving (releasing June 24, 2016 as a Netflix Original Film titled The Fundamentals of Caring, starring Paul Rudd and Selena Gomez), Jonathan Evison, author of the new novel This Is Your Life, Harriet Chance! and the New York Times bestseller West of Here, has crafted a novel of

the heart, a story of unlikely heroes in a grand American landscape. For Ben Benjamin, all has been lost--his wife, his family, his home, his livelihood. Hoping to find a new direction, he enrolls in a night class called The Fundamentals of Caregiving, where he will learn to take care of people with disabilities. He is instructed about professionalism, about how to keep an emotional distance between client and provider, and about the art of inserting catheters while avoiding liability. But when Ben is assigned his first client--a tyrannical nineteen-year-old boy named Trevor, who is in the advanced stages of Duchenne muscular dystrophy--he soon discovers that the endless service checklists have done nothing to prepare him for the reality of caring for a fiercely stubborn, sexually frustrated teenager who has an ax to grind with the whole world. Over time, the relationship between Ben and Trev, which had begun with mutual misgivings, evolves into a close friendship, and the traditional boundaries between patient and caregiver begin to blur. The bond between them strengthens as they embark on a road trip to visit Trev's ailing father--a journey rerouted by a series of bizarre roadside attractions that propel them into an impulsive adventure disrupted by one birth, two arrests, a freakish dust storm, and a six-hundred-mile cat-and-mouse pursuit by a mysterious brown Buick Skylark. By the end of that journey, Trev has had his first taste of love, and Ben has found a new reason to love life. Bursting with energy and filled with moments of absolute beauty, this big-hearted and inspired novel ponders life's terrible surprises as well as what it takes to truly care for another human being.
