From Critical Literacy to Critical Pedagogy in English Language Teaching - Melina Porto 2022-09-16

With a Foreword by Hugh Starkey and Audrey Osler, and Afterwords by Graham Crookes, Hilary Janks and Allan Luke, this book promotes critical language education and illustrates how a critical agenda can be enacted in English language education in real classrooms. It presents four cases located in primary and secondary schools in the province of Buenos Aires in Argentina in contexts that can be characterised as vulnerable or difficult. It describes the possibilities, challenges and limitations of this critical agenda using students' drawings, posters, leaflets, artwork, classroom activities and conversational data as foundation, and including the voices of local teachers in their classrooms. Importantly, these teachers used teacher-made, locally produced, critical post-method materials, described by the author of those materials in one of the chapters. In this way, the book offers a unique balance of researcher, teacher and materials writer voices. These materials are included in the book and can help language teachers around the world to introduce critical perspectives in their specific contexts. The book is appealing to researchers, classroom teachers, teacher educators, and materials writers and developers interested in critical language education.

Designing Authenticity Into Language Learning Materials - Freda Mishan 2005

This book puts forward an authenticity-centred approach to the design of materials for language learning. The premise of the approach is that language learning should be based on authentic materials drawn from a variety of genres found in the target language culture, and that the learning tasks involving these materials should be correspondingly authentic, by entailing interactions that are consistent with the original communicative purpose of the authentic text. It provides both a theoretical grounding to the authenticity-centred approach, and demonstrates its practical application in a teaching task reference section. In outline, the book: • Refines a definition of authenticity in the context of language pedagogy. • Traces the

historical background to authenticity in language learning back over one millennium. • Grounds the use of authentic materials in language learning in L2 acquisition research. • Gives a critical analysis of the authenticity of contemporary language study course-books. • Discusses the use of seven authentic genres for language learning; broadcasting, newspapers, advertisements, music and song, film, literature and ICT (information and communications technology). • Offers a set of practical principles for the design of authentic learning tasks. • Includes a reference section providing step-by-step instruction for the design and classroom procedure of learning tasks for materials taken from each of the seven genres.

Designing and Evaluating Language Corpora - Jesse Egbert 2022-04-14

Corpora are ubiquitous in linguistic research, yet to date, there has been no consensus on how to conceptualize corpus representativeness and collect corpus samples. This pioneering book bridges this gap by introducing a conceptual and methodological framework for corpus design and representativeness. Written by experts in the field, it shows how corpora can be designed and built in a way that is both optimally suited to specific research agendas, and adequately representative of the types of language use in question. It considers questions such as 'what types of texts should be included in the corpus?', and 'how many texts are required?' - highlighting that the degree of representativeness rests on the dual pillars of domain considerations and distribution considerations. The authors introduce, explain, and illustrate all aspects of this corpus representativeness framework in a step-by-step fashion, using examples and activities to help readers develop practical skills in corpus design and evaluation.

Designing Learning for Multimodal Literacy - Fei Victor Lim 2022-11-30

Designing Learning for Multimodal Literacy addresses the need to design learning for multimodal literacy in a world that is increasingly saturated with print and digital media. In the current age, communication and interactions on social media are seldom made with language alone but are often accompanied with emojis, images, and videos, making meanings multimodally. Young people, including children, are also increasingly active in making videos of themselves, their ideas, and their experiences as part of their out-of-school literacy activities. In particular, for language teachers, the present shifts in our world require that teachers re-examine what they teach and how they can meaningfully and effectively teach the students in their classes today. At 8 years old, Alden created his own rap music video and shared it with the world. He wrote his own lyrics and set it against the music he remixed and meshed from a music download site. Alden is in your classroom today. As his teacher, what would you teach him? How would you engage him? Alden, and children like him, is the inspiration for why the authors have written this book. The changing times and changing learners place a demand on educators to continually reflect on what and how teachers are teaching their students - to ensure that learning in school remains relevant, relatable, and prepares them for the world of the future. Lim's book outlines how teachers can design learning for multimodal literacy. It is a result of a collaboration between an educational researcher and a curriculum developer, and offers practical resources for practitioners but also design principles and considerations based on practice with a range of students to inform and inspire academics and postgraduate students. It is poised to contribute to the global conversation and interest on how educators can reflect on the zeitgeist of the digital age and design learning for multimodal literacy.

Designing English - Daniel Wakelin 2017-11-24

Early manuscripts in the English language include religious works, plays, romances, poetry and songs, as well as charms, notebooks, science and medieval medicine. How did scribes choose to arrange the words and images on the page in each manuscript? How did they preserve, clarify and illustrate writing in English? What visual guides were given to early readers of English in how to understand or use their books?'Designing English' is an overview of eight centuries of graphic design in manuscripts and inscriptions from the Anglo-Saxon to the early Tudor periods. Working beyond the traditions established for Latin, scribes of English needed to be more inventive, so that each book was an opportunity for redesigning. 'Designing English' focuses on the craft, agency and intentions of scribes, painters and engravers in the practical processes of making pages and artefacts. It weighs up the balance of ingenuity and copying, practicality and imagination in their work. It surveys bilingual books, format, ornamentation, decoration and reading aloud, as well as inscriptions on objects, monuments and buildings. With over ninety illustrations, drawn especially from the holdings of the Bodleian Library in Old English and Middle English, 'Designing English' gives a comprehensive overview of English books and other material texts across the Middle Ages.

Designing Teacher Evaluation Systems - Thomas Kane 2014-06-03

WHAT IS EFFECTIVE TEACHING? It's not enough to say "I know it when I see it" - not when we're expecting so much more from students and teachers than in the past. To help teachers achieve greater success with their students we need new and better ways to identify and develop effective teaching. The Measures of Effective Teaching (MET) project represents a groundbreaking effort to find out what works in the classroom. With funding by the Bill & Melinda Gates Foundation, the MET project brought together leading academics, education groups, and 3,000 teachers to study teaching and learning from every angle. Its reports on student surveys, observations, and other measures have shaped policy and practice at multiple levels. This book shares the latest lessons from the MET project. With 15 original studies, some of the field's most preeminent experts tap the MET project's unprecedented collection of data to offer new insights on evaluation methods and the current state of teaching in our schools. Developing Advanced English Language Competence - Armin Berger 2021

This volume presents a systematic approach to developing advanced English language competence at tertiary level. It includes the reflections of experienced language teachers and teacher-researchers in the English Language Competence programme at the University of Vienna and provides examples of good practice, amalgamating teaching expertise and research with aspects of curriculum design and programme management. The book addresses a growing academic and professional interest in understanding advanced

language learning and use. To date, research has tended to investigate advanced proficiency from a specific theoretical viewpoint, for example cognition, psycholinguistic processing strategies, or the assumption of a critical period or the age factor. In contrast, this work examines advanced proficiency from a curricular and instructional perspective by providing a profile of advanced-level language development in a specific institutional context. It brings together three areas of language education: curriculum design, pedagogical practice, and research. Within this triangle, advanced English language education is the focus or, conversely, advanced English language education provides the lens through which links between curriculum design, teaching, and research can be established.
