Art and Politics - Claudia Mesch 2014-10-10

Contemporary art is increasingly concerned with swaying the opinions of its viewer. To do so, the art employs various strategies to convey a political message. This book provides readers with the tools to decode and appreciate political art, a crucial and understudied direction in post-war art. From the postwar works of Pablo Picasso and Alexander Deineka to the Border Film Project and web-based works of Beatriz da Costa, *Art and Politics: a Small History of Art for Social Change after 1945* considers how artists visual or otherwise have engaged with major political and grassroots movements, particularly after 1960. With its broad definition of the political, this book features chapters on postcolonialism, feminism, the anti-war movement, environmentalism, gay rights and anti-globalization. It charts how individual artworks reverberated with enormous ideological shifts. While emphasising the West, *Art and Politics* takes global developments into account as well - looking at art production

practiced by postcolonial African, Latin American and Middle Eastern artists. Its case-study approach to the subject provides the reader with an overview of a most complex subject. This book will also challenge its readers to consider often devalued and marginalised political artworks as properly part of the history of modern and contemporary art.

French Foreign Policy since 1945 - Frédéric Bozo 2016-08-01

When Charles de Gaulle declared that “it is because we are no longer a great power that we need a grand policy,” he neatly summarized France’s predicament on the world scene. In this compact and engaging history, author Frédéric Bozo deftly recounts France’s efforts to reconcile its proud history and global ambitions with a realistic appraisal of its capabilities, from the aftermath of World War II to the present. He provides insightful analysis of the nation’s triumphs and setbacks through the years of decolonization, Cold War maneuvering, and

European unification, as well as the more contemporary challenges posed by an increasingly multipolar and interconnected world.

The United States and Western Europe Since 1945 - Geir Lundestad 2005-08-11

Based on new and existing research by a world-class scholar, this is the first book in twenty years to examine the dynamics of the entire American-West European relationship since 1945. The relationship between the United States and Western Europe has always been crucial and recent events dictate that it is becoming ever more so. In this important new work, Geir Lundestad analyses the balance between the cooperation and conflict which has characterized this relationship in the post-war period. He examines talk of transatlantic drift, and the strain now apparent between the USA and the nation states of Western Europe. In the concluding section, Lundestad offers a topical view of the future of transatlantic interaction.

Throughout the work Lundestad's much cited 'empire by invitation' thesis is both put into practice and extended in time and scope. This book is essential reading for anyone interested in one of the most important and enduring international relationships of the last sixty years.

Rebirth - Cyril Black 2018-05-04

Rebirth: A History of Europe Since World War II examines the transition of Europe from a period of crisis to an era of political confidence and economic strength. As the title suggests, the pervasive theme of the book is that of rebirth. The most recent decades are set in the context of modern European history as a whole. The authors trace the disillusionment and

uncertainty that overcame Europe at the turn of the twentieth century and that culminated in the devastation of the Second World War. In their analysis of the political and economic causes of the renaissance that has followed the demise of the Cold War, the authors highlight the themes of national integration and economic modernization. The chapters are uniquely organized to present both international and domestic developments in Europe as coherent wholes as well as the importance of their interaction. The initial analysis of key international developments in the twentieth century helps students to understand the relationship between foreign and domestic events and provides background for the substantial discussion of the major European countries that follows in chapters devoted to each national experience. The political and economic histories of these nation-states are considered in terms of their individual traditions and challenges, and the authors explore difficult

issues such as the overall costs and benefits of the scientific-technological revolution, the pursuit of social justice, the proper role of the state and of political parties, and contrasting national paths of economic and political development. *Rebirth* is designed as a text for use in courses on modern European history ? especially twentieth-century Europe ? and for students of comparative politics who are seeking a substantial consideration of the historical factors of European politics. In this revised edition, the authors have updated the text with an analysis of developments since 1991 and added recent scholarship to the lists of Suggested Readings.

War: How Conflict Shaped Us - Margaret MacMillan 2020-10-06

Is peace an aberration? The bestselling author of *Paris 1919* offers a provocative view of war as an essential component of humanity. NAMED ONE OF THE TEN BEST BOOKS OF THE YEAR BY THE NEW YORK TIMES BOOK REVIEW AND THE EAST HAMPTON STAR “Margaret MacMillan has produced another seminal work. . . She is right that we must, more than ever, think about war. And she has shown us how in

this brilliant, elegantly written book.”—H.R. McMaster, author of *Dereliction of Duty* and *Battlegrounds: The Fight to Defend the Free World* The instinct to fight may be innate in human nature, but war—organized violence—comes with organized society. War has shaped humanity’s history, its social and political institutions, its values and ideas. Our very language, our public spaces, our private memories, and some of our greatest cultural treasures reflect the glory and the misery of war. War is an uncomfortable and challenging subject not least because it brings out both the vilest and the noblest aspects of humanity. Margaret MacMillan looks at the ways in which war has influenced human society and how, in turn, changes in political organization, technology, or ideologies have affected how and why we fight. *War: How Conflict Shaped Us* explores such much-debated and controversial questions as: When did war first start? Does human nature doom us to fight one another? Why has war been

described as the most organized of all human activities? Why are warriors almost always men? Is war ever within our control? Drawing on lessons from wars throughout the past, from classical history to the present day, MacMillan reveals the many faces of war—the way it has determined our past, our future, our views of the world, and our very conception of ourselves.

The European Economy Since 1945 - Barry Eichengreen 2008-07-21

A Social History of Europe, 1945-2000 - Hartmut Kaelble 2013

Since 1945 Europe has experienced many periods of turmoil and conflict and as many moments of peace and integration: from the devastation felt in the aftermath of World War II to the recovery in the 1950s and 1960s; to the new challenges in the 1970s and 1980s when neoliberal policies led to fundamental social and economic changes, marked by the effects of the oil shock and widespread unemployment; and

then 1989 and after when the existing world order experienced new convulsions. In this brilliant and comprehensive work, the author, one of the best known social historians of Europe, discusses a wide range of subjects, not shying away from controversial topics: family structure, work, consumption, values, migration, inequality, elites, civil society, social movements, media, welfare state, education, and urban policies. He focuses on the fundamental changes European societies underwent in the second half of the twentieth century but also explores what divides Europeans, what unites them, and what sets them apart from the rest of the world. This major historical work will be an important and highly sought-after addition for library collections as well as an important volume for course adoptions.

Growing Up America - Susan Eckelmann Berghel 2019

Growing Up America brings together new scholarship that considers the role of children

and teenagers in shaping American political life during the decades following the Second World War. Growing Up America places young people--and their representations--at the center of key political trends, illuminating the dynamic and complex roles played by youth in the midcentury rights revolutions, in constructing and challenging cultural norms, and in navigating the vicissitudes of American foreign policy and diplomatic relations. The authors featured here reveal how young people have served as both political actors and subjects from the early Cold War through the late twentieth-century Age of Fracture. At the same time, Growing Up America contends that the politics of childhood and youth extends far beyond organized activism and the ballot box. By unveiling how science fairs, breakfast nooks, Boy Scout meetings, home economics classrooms, and correspondence functioned as political spaces, this anthology encourages a reassessment of the scope and nature of modern politics itself.

Development and Disorder - Michael G. Mason
1997

A contemporary history of the Third World that explains why most of these countries failed to develop in ways which benefit the majority of their populations.

Making Art History in Europe After 1945 -
Noemi de Haro García 2019-12-12

This book analyses the intermeshing of state power and art history in Europe since 1945 and up to the present from a critical, de-centered perspective. Devoting special attention to European peripheries and to under-researched transnational cultural political initiatives related to the arts implemented after the end of the Second World War, the contributors explore the ways in which this relationship crystallised in specific moments, places, discourses and practices. They make the historic hegemonic centres of the discipline converse with Europe's Southern and Eastern peripheries, from Portugal to Estonia to Greece. By stressing the margins'

point of view this volume rethinks the ideological grounds on which art history and the European Union have been constructed as well as the role played by art and culture in the very concept of 'Europe.'

The World Aflame - Dan Jones 2020-05-14
'Purists argue that colourising black and white photographs is sacrilege, but the world has always been in colour. Truth be told, monochrome is a contrivance. Human experience is always colourful' The Times. The epic, harrowing and world-changing story - in words and colorized images - of global conflict from the assassination of the Archduke Franz Ferdinand to the obliteration of Hiroshima by the dropping of the first atom bomb. The World Aflame will embrace not only the total conflagrations of 1914-18 and 1939-45 and the international tensions, conflicting ideologies and malign economic forces that set them in train, but also the civil wars of the interwar period in Ireland and Spain, wars in Latin America,

brehtaking way ... Even the casual reader leafing through these pages will be stopped in their tracks, connected to people from the past like never before - at last, in living colour' Irish News. 'Jones sketches with wry economy not only the historical context but the purpose of the photograph, from documented reality to shameless propaganda, from official portrait to candid snap ... There is much to enjoy here. As a history book, it acts as a fleeting guide to a tumultuous century. But as an aesthetic experiment it is remarkably successful' Daily Express. 'What also elevates *The Colour of Time* above regular coffee table fare is the startling vivacity and impact of the photographs chosen, and the concise but focused and gripping texts by Jones, making the book a worthwhile cover-to-cover read as much as it serves as a showcase book to dip into at will' All About History.

The World Since 1945 - Keith Robbins 1998

This accessible and stimulating account of world history since 1945 provides a framework for

making sense of the political and social developments of this period. The underlying theme of the book is the tension between the world conceived as a unity and the world conceived as a diversity. From this perspective, the author discusses the impulse towards globalization in the aftermath of the Second World War, the divisions inherent in the Cold War, and the shifting allegiances and conflicts in the decades which followed. He ends with an assessment of our position with regard to world unity and disunity as the millennium approaches. *Year Zero* - Ian Buruma 2014-09-30

A marvelous global history of the pivotal year 1945 as a new world emerged from the ruins of World War II *Year Zero* is a landmark reckoning with the great drama that ensued after war came to an end in 1945. One world had ended and a new, uncertain one was beginning. Regime change had come on a global scale: across Asia (including China, Korea, Indochina, and the Philippines, and of course Japan) and all of

continental Europe. Out of the often vicious power struggles that ensued emerged the modern world as we know it. In human terms, the scale of transformation is almost impossible to imagine. Great cities around the world lay in ruins, their populations decimated, displaced, starving. Harsh revenge was meted out on a wide scale, and the ground was laid for much horror to come. At the same time, in the wake of unspeakable loss, the euphoria of the liberated was extraordinary, and the revelry unprecedented. The postwar years gave rise to the European welfare state, the United Nations, decolonization, Japanese pacifism, and the European Union. Social, cultural, and political "reeducation" was imposed on vanquished by victors on a scale that also had no historical precedent. Much that was done was ill advised, but in hindsight, as Ian Buruma shows us, these efforts were in fact relatively enlightened, humane, and effective. A poignant grace note throughout this history is Buruma's own father's

story. Seized by the Nazis during the occupation of Holland, he spent much of the war in Berlin as a laborer, and by war's end was literally hiding in the rubble of a flattened city, having barely managed to survive starvation rations, Allied bombing, and Soviet shock troops when the end came. His journey home and attempted reentry into "normalcy" stand in many ways for his generation's experience. A work of enormous range and stirring human drama, conjuring both the Asian and European theaters with equal fluency, *Year Zero* is a book that Ian Buruma is perhaps uniquely positioned to write. It is surely his masterpiece.

A Global History of the Cold War, 1945-1991

- Philip Jenkins 2021-09-25

This textbook provides a dynamic and concise overview of the Cold War. Offering balanced coverage of the whole era, it takes a firmly global approach, showing how at various times the focus of East-West rivalry shifted to new and surprising venues, from Laos to Katanga, from Nicaragua to Angola. Throughout, Jenkins emphasises intelligence, technology and religion, as well as highlighting themes that are relevant to the present day. A rich array of

popular culture examples is used to demonstrate how the crisis was understood and perceived by mainstream audiences across the world, and the book includes three 'snapshot' chapters, which offer an overview of the state of play at pivotal moments in the conflict - 1946, 1968 and 1980 - in order to illuminate the inter-relationship between apparently discrete situations. This is an essential introduction for students studying Cold War, twentieth century or Global history. [A History of the Book in America](#) - David Paul Nord 2015-12-01

The fifth volume of *A History of the Book in America* addresses the economic, social, and cultural shifts affecting print culture from World War II to the present. During this period factors such as the expansion of government, the growth of higher education, the climate of the Cold War, globalization, and the development of multimedia and digital technologies influenced the patterns of consolidation and diversification established earlier. The thirty-three contributors

to the volume explore the evolution of the publishing industry and the business of bookselling. The histories of government publishing, law and policy, the periodical press, literary criticism, and reading--in settings such as schools, libraries, book clubs, self-help programs, and collectors' societies--receive imaginative scrutiny as well. The *Enduring Book* demonstrates that the corporate consolidations of the last half-century have left space for the independent publisher, that multiplicity continues to define American print culture, and that even in the digital age, the book endures. End of History and the Last Man - Francis Fukuyama 2006-03-01

Ever since its first publication in 1992, *The End of History and the Last Man* has provoked controversy and debate. Francis Fukuyama's prescient analysis of religious fundamentalism, politics, scientific progress, ethical codes, and war is as essential for a world fighting fundamentalist terrorists as it was for the end of the Cold War. Now updated with a new afterword, *The End of History and the Last Man* is a modern classic.

The Columbia History of Post-World War II America - Mark Christopher Carnes 2007

Rather than divide this period into such traditional categories as "women," "television," and "politics," contributors take a cross-topical approach that emphasizes the interconnectedness of American life and

society. Beginning with an analysis of cultural themes and ending with a discussion of evolving and expanding political and corporate institutions, these essays address changes in America's response to the outside world; the merging of psychological states and social patterns in memorial culture, scandal culture, and consumer culture; the intersection of social practices and governmental policies; the effect of technological change on society and politics; and the intersection of changing belief systems and technological development, among other issues. Many had feared that Orwellian institutions would crush the individual in the postwar era, but a major theme of this book is the persistence of individuality and diversity

Beautiful Data - Orit Halpern 2015-01-05

Beautiful Data is both a history of big data and interactivity, and a sophisticated meditation on ideas about vision and cognition in the second half of the twentieth century. Contending that our forms of attention, observation, and truth are contingent and contested, Orit Halpern historicizes the ways that we are trained, and train ourselves, to observe and analyze the world. Tracing the postwar impact of cybernetics and the communication sciences on the social and human sciences, design, arts, and urban planning, she finds a radical shift in attitudes toward recording and displaying information. These changed attitudes produced what she calls communicative objectivity: new forms of observation, rationality, and economy based on the management and analysis of data. Halpern complicates assumptions about the value of data

and visualization, arguing that changes in how we manage and train perception, and define reason and intelligence, are also transformations in governmentality. She also challenges the paradoxical belief that we are experiencing a crisis of attention caused by digital media, a crisis that can be resolved only through intensified media consumption.

China and the World Since 1945 - Chi-kwan Mark 2013-03

The emergence of China as a dominant regional power with global influence is a significant phenomenon in the twenty-first century. Its origin could be traced back to 1949 when the Chinese Communist Party under Mao Zedong came to power and vowed to transform China and the world. After the 'century of humiliation', China was in constant search of a new identity on the world stage. From alliance with the Soviet Union in the 1950s, China normalized relations with America in the 1970s and embraced the global economy and the international community since the 1980s. This book examines China's changing relations with

the two superpowers, Asian neighbours, Third World countries, and European powers. China and the World since 1945 offers an overview of China's involvement in the Korean War, the Sino-Soviet split, Sino-American rapprochement, the end of the Cold War, and globalization. It assesses the roles of security, ideology, and domestic politics in Chinese foreign policy and provides a synthesis of the latest archival-based research on China's diplomatic history and Cold War international history. This engaging new study examines the rise of China from a long-term historical perspective and will be essential to students of Chinese history and contemporary international relations.

Postwar - Simon Young 2017-07-05

Tony Judt decided to write *Postwar* in 1989, the year the collapse of the Soviet Union provided European history with a rare example of a clearly-signposted 'end of an era'. It's scarcely surprising, then, that the great virtue of Judt's book is the clarity and the breadth of its account

of postwar Europe. His book coalesces around one central theme: the idea that the whole of the history of this period can be explained as an unravelling of the consequences of World War II. A bold claim, but Judt's exceptional ability to create strong, well-structured, inclusive arguments allows him to pull it off convincingly. Judt's work is also a fine example of creative thinking, in that he excels in connecting things together in new and interesting ways. This virtue

extends from his unusual ability to combine the best elements of the Anglo-American and the French historiographical traditions – the latter informing his strong interest in the importance of cultural history – to his unwillingness to allow himself to be constrained by historical category and ultimately to his linguistic abilities. Postwar is, above all, a triumph of integration, something that is only made possible by its author's flair for creating strong, persuasive arguments.
