Practical Research in Distance Teaching - Roger Mitton 1982

The linking of research and action, basic methods of social research, and the uses of research in distance teaching are examined, with examples drawn from the Lesotho Distance Teaching Centre and other distance teaching

programs. Ways in which research can be useful and early stages of research design and planning are discussed. An explanation of basic research methods describes observation and discussion techniques and then details the steps involved in conducting social surveys, including sampling, creating questionnaires, survey fieldwork, data processing, and checking and reporting survey results. Experimental research is also addressed, and basic statistical concepts are introduced. Suggestions for applications of research in distance teaching settings relate to assessing instructional materials, pre-testing instructional materials, keeping regular records, and evaluation. Appendices contain additional information on statistical procedures, statistical theory, and costing, and an annotated list of 20 recommended readings. A four-page reference list, a list of potentially helpful organizations, and basic statistical tables are included. (LMM)

**Behavior Management: From Theoretical
Implications to Practical Applications** - John
W. Maag 2016-09-14

Authored by nationally recognized scholar and
behavioral consultant Dr. John W. Maag, this
book focuses primarily on students' observable
behaviors and the environmental factors that
affect their expression. As Maag points out,
behavior management is probably one of the
most misunderstood concepts in education.
Written in a very accessible style, this book
demystifies stereotypical beliefs and
misconceptions regarding the use of
reinforcement, punishment, and self-control.
Maag offers clear, but detailed descriptions of
proven intervention techniques, supplemented
by a range of step-by-step guidelines, sample
forms, charts, graphs, and illustrations that

assist teachers in implementing the techniques. Although the techniques described in the book are based on a sound theoretical and empirical foundation, the author limits the use of technical jargon and infuses real-life examples and case studies that clarify and illuminate the presentation. Foreign armies clash relentlessly on streets laden with the bodies of innocents caught in the crossfire. Cultists and thieves wage shadow wars, tribal armies foment outside the city's walls, and haughty aristocrats watch the world burn from on high. As his companions struggle to keep the city from destroying itself, Lenk

travels to the Forbidden East in search of the demon who caused it all. But even as he pursues Khoth-Kapira, dark whispers plague his thoughts. Khoth-Kapira promises him a world free of war where Lenk can put down his sword at last. And Lenk finds it hard not to listen. When gods are deaf, demons will speak.
