Cry Slaughter! - Edilberto K. Tiempo 2020-02-25

Cry Slaughter!, first published in 1957 is a fictionalized account of guerrilla life in the central Philippines during the Second World War. Filipino author E. K. Tiempo (1913-1996), himself a member of the Filipino resistance to the Japanese occupation, paints a vivid picture of life under the Japanese, and the difficulties faced in deciding to surrender to the Japanese or take to the mountains and form a guerrilla force. As Tiempo states in the introduction to the book, "Cry Slaughter! was based on actual situations, including the central situation of the shooting of the four envoys by the minister in the story. Many incidents in the novel were taken from They Called Us Outlaws, a non-fiction work which I wrote for the Seventh Military District of the Philippine resistance forces, as part of my work as officer in charge of the historical section. Parts of They Called Us Outlaws, (the Japanese labeled the guerrillas outlaws in those days) were used in the trial of Japanese war criminals in Manila after the war. The original manuscript of Cry Slaughter! was taken out of the Philippines in a submarine in 1943 under cover of a Philippine blackout; perhaps it was the only manuscript to successfully leave the Philippines" during the War.

Measuring Bullying Victimization, Perpetration, and Bystander Experiences - Merle E. Hamburger 2014-05-12

Bullying, particularly among school-age children, is a major public health problem both domestically and internationally (Nansel, Craig, Overpeck, Saluja, & Ruan, 2004). Current estimates suggest that nearly 30% of American adolescents reported at least moderate bullying experiences as the bully, the victim, or both. Specifically, of a nationally representative sample of adolescents, 13% reported being a bully, 11% reported being a victim of bullying, and 6% reported being both a bully and a victim (Nansel et al., 2001).

The Wave - Todd Strasser 2013-01-08

This novel dramatizes an incident that took place in a California school in 1969. A teacher creates an experimental movement in his class to help students understand how people could have followed Hitler. The results are astounding. The highly disciplined group, modeled on the principles of the Hitler Youth, has its own salute, chants, and special ways of acting as a unit and sweeps beyond the class and throughout the school, evolving into a society willing to give up freedom for regimentation and blind obedience to their leader. All will learn a lesson that will never be forgotten.

RABBI BEN EZRA - ROBERT BROWNING 1902

Security Ethics - Katerina Hadjimatheou 2016

Governments often act in the name of security to protect their citizenries. For example by legislation or by the recruitment and employment of large numbers of armed personnel to detect and prosecute violent crime, or via engagements in military interventions to repel or pre-empt foreign attacks. These practices are often taken to have strong moral justifications. The value of security is linked to the value of life and the disvalue of violence and injury, and all of these are central both to theoretical accounts of and common sense views about the difference between right and wrong. The essays in this volume seek to increase our understanding of state action in the name of security and take a range of viewpoints and approaches. Some articles attempt to delimit the concept of security, or dispute attempted delimitations; some consider security as a 'good' and ask what sort of good it is, and how valuable; whilst others consider the relation between state action in the name of security and state action in the name of other goods, notably liberty, or consider ethical issues in health security, climate security and cybersecurity. Overall, this collection of essays shows how appeals by governments to the value of security have grown out of relatively recent events and processes at a global level, such as the response to pandemics, the acceleration of climate change, and counter-terrorism. The volume features an introductory essay and forms part of a five-volume

series on legal ethics and the enforcement of law.

Learner-Centered Teaching - Maryellen Weimer 2008-05-02

In this much needed resource, Maryellen Weimer—one of the nation's most highly regarded authorities on effective college teaching—offers a comprehensive work on the topic of learner-centered teaching in the college and university classroom. As the author explains, learner-centered teaching focuses attention on what the student is learning, how the student is learning, the conditions under which the student is learning, whether the student is retaining and applying the learning, and how current learning positions the student for future learning. To help educators accomplish the goals of learner-centered teaching, this important book presents the meaning, practice, and ramifications of the learner-centered approach, and how this approach transforms the college classroom environment. Learner-Centered Teaching shows how to tie teaching and curriculum to the process and objectives of learning rather than to the content delivery alone.

Burning Down the House - Nell Bernstein 2014-06-03

When teenagers scuffle during a basketball game, they are typically benched. But when Will got into it on the court, he and his rival were sprayed in the face at close range by a chemical similar to Mace, denied a shower for twenty-four hours, and then locked in solitary confinement for a month. One in three American children will be arrested by the time they are twenty-three, and many will spend time locked inside horrific detention centers that defy everything we know about how to rehabilitate young offenders. In a clear-eyed indictment of the juvenile justice system run amok, award-winning journalist Nell Bernstein shows that there is no right way to lock up a child. The very act of isolation denies delinquent children the thing that is most essential to their growth and rehabilitation: positive relationships with caring adults. Bernstein introduces us to youth across the nation who have suffered violence and psychological torture at the hands of the state. She presents these youths all as fully realized people, not victims. As they describe in their own voices their fight to maintain their humanity and protect their individuality in environments that would

deny both, these young people offer a hopeful alternative to the doomed effort to reform a system that should only be dismantled. Burning Down the House is a clarion call to shut down our nation's brutal and counterproductive juvenile prisons and bring our children home.

Achieving Adult Literacy - Pamela J. Farris 1992

Leaders in business and industry are demanding workers who not only can read and write but can think creatively and critically and solve problems. Federal- and state-funded programs and volunteer organizations are involved with adult literacy. Increasingly, corporations are funding adult literacy projects. Adults read for different reasons than they did when in school. Their reading relates to work-related tasks; they read to keep up with current events or for their own enjoyment. A first goal of an adult literacy program should be to enhance the self-esteem and self-concept of low-literate adults. Appropriate instructional strategies are the language experience approach; cooperative learning; dialogue journals; books on tape; tutor as a model for oral reading; cloze procedure; graphic organizers; Know, Want to Know, Learned; and computers. Effective assessment methods are standardized and competency tests, checklists, and portfolios. Programs that show the diversity of adult literacy programs in the United States are intergenerational adult literacy projects; Project: Learn, a literature-based adult literacy program; Siskiyou County READ (Reading, Education, and Development) Project, a rural adult literacy effort; workplace literacy programs; Project Literacy United States; and volunteer efforts. A Global Perspective of Young Adolescents' Peer Aggression and Well-being - Grace Skrzypiec 2019-07-19

Reporting on the findings from a study of young people across 11 different world locations (Australia, Mainland China, Greece, India, Indonesia, Italy, Korea, The Philippines, Poland, Spain, and Taiwan), A Global Perspective of Young Adolescents' Peer Aggression and Well-being looks beyond bullying to assess the harm to mental health and well-being of young people experiencing peer aggression in all its forms. The first book in a global movement that recommends a new dialogue on peer aggression, this book delves into the poorly understood nexus of peer aggression and bullying through the use of statistical data from questionnaires, as well as the students' own words and illustrations. By considering data from multiple countries, it addresses critical questions about cultural variation in aggression and associated well-being. Addressing the issue that there is a growing focus on other forms of aggression other than bullying, A Global Perspective of Young Adolescents' Peer Aggression and Well-being will offer invaluable insight for practicing teachers and school counsellors, as well as any researchers with an interest in the health and well-being of young adolescents.
