Forensic Uses of Clinical Assessment Instruments - Robert P. Archer 2013-04-26

This book provides, in a single volume, an extensive, research-based evaluation of the most popular clinical assessment tools as applied in forensic settings. These widely used instruments often require important modifications in their administration and interpretation when used for forensic purposes, and it is vital that the clinician is intimately familiar with their correct application, as well as their limitations. The test instruments included are analyzed by senior figures in the field of psychological assessment who are uniquely qualified to discuss them because they have either had a crucial role in the development of the tests, or they have dedicated their careers to advancing our understanding of these clinical assessment measures. Each chapter begins with a summary of the development of the assessment instrument in its more traditional applications in clinical settings, and then considers its utilization in forensic settings. The types of forensic issues which have been addressed with that instrument are reviewed, and an illustrative case example is given which reflects the types of uses and limitations of the assessment technique when applied in a forensic context. New in this edition are a chapter on the MMPI-2-RF and separate chapters for the adult and youth versions of the Hare Psychopathy Checklist. Psychologists using assessment instruments in applied forensic settings will find this to be a valuable and practical source of information, as will attorneys wishing to gain an understanding of the application of these psychological assessment approaches in the courtroom.

Psychological Criminology - Richard Wortley 2011-04-12

Psychological Criminology addresses the question: what is it about individuals and their experiences that cause them to commit crime and/or to become criminal? This book provides a comprehensive coverage of psychological theories of crime and criminality, exploring theories focusing on factors present at birth (human nature, heredity); theories that focus on factors that influence the offender over the lifespan (learning, development); and theories focusing on factors present at the crime scene. It emphasizes the connections among the different approaches, and demonstrates how, taken together rather than as rival explanations, they provide a more complete picture of crime and criminality than each provides individually. Theories are arranged throughout the book in a temporal sequence, from distal to proximal causes of crime. The analysis spans 100,000 years, from the evolutionary roots of criminal behaviour in the ancestral environments of early humans on the African savana, to the decision to engage in a specific criminal act. Key features of the book include: a focus on theory - 'explaining' crime and criminality, an integrative approach, accessible to readers who do not have a background in psychology. Psychological Criminology highlights the contributions that psychological theory can make to the broader field of

criminology; it will be of interest to students, academics, researchers and practitioners in both criminology and forensic psychology.

Introduction to Psychology and Law - James R.P. Ogloff 2001-04-15

Despite the notable Canadian presence in the field of psychology and law, there is currently no comprehensive Canadian textbook on the subject. While a few U.S. textbooks cover the field, they give little or no attention to Canadian law and research. In recognition of this problem, editors Regina Schuller and James Ogloff have put together an authoritative introduction to law and psychology for a Canadian audience. Within the fifteen chapters that comprise the book, leading Canadian scholars cover a wide range of topics spanning the applications of psychology - clinical, social, cognitive, developmental, experimental - in both criminal and civil areas of law. These include memory and eyewitness testimony, the jury, sentencing, competency to stand trial, criminal responsibility, and many others. The legal system in Canada serves as the backdrop for each of the chapters, which begin with an interesting case or anecdote that introduces the reader to some of the major issues facing psychologists and lawyers in this country. The book offers a compelling introduction to the field and a unique perspective to Canadian readers, especially students in psychology, criminology, and other disciplines in social science and law.

The Development of Criminal and Antisocial Behavior - Julien Morizot 2014-12-02

This edited book summarizes the current state of knowledge on the development of criminal and antisocial behavior over the life course. It focuses mainly on the developmental perspective, which has had a paradigmatic influence on current theoretical and empirical works in criminology. With a multidisciplinary perspective, the book reviews: (a) the fundamental concepts of developmental criminology; (b) the risk factors and developmental processes related to the most salient personal (e.g., genetics, personality) and environmental (e.g., family, peers, school) domains explaining the development of criminal and antisocial behavior; (c) the developmental issues related to a number of special themes (e.g., women criminality, street gangs) and (d) the applied and policy implications of research in developmental criminology. In each chapter, prominent researchers from different disciplines such as criminology and psychology summarize the state of knowledge on a specific topic, identify the shortcomings of past research, offer recommendations for future research needs.

Tackling Sexual Violence at Universities - Graham J. Towl 2019-03-04

Sexual violence is a problem well beyond universities, however universities are uniquely well placed to contribute to reducing sexual violence, encouraging those affected to come forward and speak about their experiences and actively encourage increased reporting. This book is unique, in that it offers an international perspective on the incidence, reporting and impact of sexual violence at universities. Drawing on evidence from the UK, North America, Australia and Europe, Towl and Walker explore the psychological and structural challenges to reporting sexual violence. They provide a set of policy and practice guidance recommendations that move beyond awareness campaigns to call for systems to be put in place whereby reports of sexual assault are handled promptly, fairly and consistently. They also discuss how universities can strengthen their approach to prevention, promoting safeguarding and the welfare of victims and survivors, and involving victims and survivors in the development and improvement of services. However, fundamental to their approach is keeping decision making with the victim and survivor, and emphasising that their health and recovery is paramount. Tackling Sexual Violence at Universities is an invaluable and ground-breaking resource for students and researchers in forensic psychology and criminology, as well as professionals working in higher education. The authors are donating their royalties in full to Kirklees and Calderdale Rape & Sexual Abuse Centre (KCRASACC), UK, a small registered charity that provides specialist therapy, counselling advocacy and support for survivors of sexual or domestic violence and abuse. Running for nearly 30 years, the centre works with young people and adults over the age of 13.

The Colonial Problem - Lisa Monchalin 2016-03-08

Indigenous peoples are vastly overrepresented in the Canadian criminal justice system. The Canadian government has framed this disproportionate victimization and criminalization as being an "Indian problem." In *The Colonial Problem*, Lisa Monchalin challenges the myth of the "Indian problem" and encourages readers to view the crimes and injustices affecting Indigenous peoples from a more culturally aware position. She analyzes the consequences of assimilation policies, dishonoured treaty agreements, manipulative legislation, and systematic racism, arguing that the overrepresentation of Indigenous peoples in the Canadian criminal justice system is not an Indian problem but a colonial one.

Missing the Revolution - Jerome H. Barkow 2006

"The naturalizing perspective of Darwinian thought has become one of the major intellectual currents of our time, pervading contemporary understandings of human nature and society. Unfortunately, many social scientists in sociology, psychology, and sociocultural anthropology have failed to engage with it. Barkow asks his fellow social scientists to put aside their all-too-common preconceptions and stereotypes of the "biological" and to consider a powerful argument that is far different from that of those who once invoked a vocabulary of genes and Darwin as a justification for genocide. He argues that the theoretical perspective that has been so successful when applied to the behavior of every other animal species can be applied just as successfully to our own, and that the real debate is about how to apply it."--BOOK JACKET.

The Myth of the Born Criminal offers the first comprehensive critique of the concept of psychopathy from the eighteenth-century origins of the born-criminal theory to the latest neuroimaging, behavioural genetics, and statistical studies. Jarkko Jalava, Stephanie Griffiths, and Michael Maraun use their expertise in neuropsychology, psychometrics, and criminology to dispel the myth that psychopathy is a biologically-based condition. Deconstructing the emotive language with which both research scientists and reporters describe the psychopaths among us, they explain how the idea of psychopathy offers a comforting neurobiological solution to the mystery of evil"--Preliminary page.

Provides multidisciplinary coverage of stalking behavior worldwide from both academic and practical approaches *Psycho-Criminological Approaches to Stalking Behavior: The International Perspective* is a thorough, up-to-date overview of stalking perpetration and victimization in different regions of the world. This authoritative book brings together contributions from a team of leading scholars and practitioners that discuss a diverse range of interrelated topics and issues relevant to stalking and intrusive behavior from both theoretical and practical contexts. Divided into three parts, the book first examines theories and research on cross-national differences in stalking among college students, ex-partner stalking in Finland, cyberstalking victimization in Singapore, the heterogeneity of stalking and stalkers in Australia, public familiarity and understanding of stalking/harassing legislation in Australia, the United Kingdom, and the United States, and more. Finally in the third section of the book, the chapters largely emphasize policy and best practice, including the Dutch model of policing stalking, risk assessment and management of stalking in Sweden, psycho-legal responses to online interpersonal harm, the German approach to stopping stalking, the United Kingdom response to assessing and managing stalking, and the work of the Danish Stalking Centre. This important contribution to the field: Offers insights from international professionals applicable in other geographical contexts Discusses the factors that influence social awareness and responses to stalking Explores the importance of victim vulnerability factors when managing risk of stalking Presents real-world case studies of stalking behavior, intimate partner violence, stalking victimization, and statutory and law enforcement efforts Reviews the intervention practices of the support institutions and justice systems of different countries *Psycho-Criminological Approaches to Stalking Behavior: The International Perspective* is an ideal primary or supplementary text for courses in criminology, criminal justice, forensic psychology, and social and behavioral science, as well as a valuable source of reference for those who deal with offenders or victims of stalking, including law enforcement agents, mental health professionals, legal practitioners, social services personnel, and policy makers.

The Psychology of Criminal Conduct - James Bonta 2016-08-22

The Psychology of Criminal Conduct, 6th Edition, provides a foundational description of risk assessment for individuals involved in the criminal justice system, drawing upon general personality as well as cognitive-

behavioral and cognitive social learning perspectives. James Bonta and Donald Andrews offer a coherent theory of criminal behavior that is empirically supported throughout the book. They provide an overview of theoretical context and major knowledge base of the psychology of criminal conduct, discuss the eight major risk/need factors of criminal conduct, examine the prediction and classification of criminal behavior along with prevention and rehabilitation, and finally summarize the major issues in understanding criminal conduct. This book also offers the Risk/Need/Responsivity (RNR) model, a model of offender assessment and treatment that has guided developments in the area. In this edition, the first since Andrews' death, Bonta carefully maintains all the book's original contributions while presenting these core concepts succinctly, clearly, and elegantly. Appropriate for advanced undergraduates and graduate students as well as for scholars, researchers, and practitioners, The Psychology of Criminal Conduct, 6th Edition, improves upon and extends the content of this important book with further refinements of the authors' body of work. The Assessment and Treatment of Women Offenders - Kelley Blanchette 2006-05-01

There is a large body of research that provides guidance for those working with offenders on how they should be treated once they are in the correctional system. The problem is that most, if not all this research has been conducted on all male populations and it is assumed that women offenders are the same.

However, women have different needs and support systems than men in some areas of their lives and it is unclear whether all research based on men can be generalized in this way. The book provides a review of the research literature to guide evidence-based practice in the assessment and treatment of adult female offenders. An historical overview of women's crime and imprisonment will be followed by a global review of various theories of female criminality. The remainder of the book reviews the psychology of criminal conduct, with a specific focus on three psychological principles of effective intervention: risk, need and responsivity. Respectively, these principles set the "who", "what" and "how" for correctional intervention.

CRIMINAL PSYCHOLOGY - Laurence Miller 2012-01-01

Criminal psychology is the application of the principles of normal and abnormal psychology to the understanding, prediction, and control of criminal behavior. *Criminal Psychology: Nature, Nurture, Culture* provides an in-depth yet readable introduction to the foundations of criminal psychology as it is understood and practiced from the classroom to the courtroom. The book is organized into five sections. Part I examines the nature and origins of criminal behavior. These chapters outline the role of psychology in the criminal justice system, and review the biology, psychology, and sociology of crime to develop a naturalistic model of criminal behavior that can guide theory and practice in law enforcement, criminal justice, and forensic evaluation. Part II examines the major classes of mental disorder that may be associated with criminal behavior, including psychotic disorders, mood disorders, organic brain syndromes, substance abuse, and personality disorders. Each chapter consists of a description of the syndrome, followed by applications to law enforcement, criminal justice, and forensic mental health issues of competency, sanity, and criminal culpability. Part III deals with death. Topics include homicide, serial murder, mass homicide, workplace and school violence, and terrorism. Part IV covers sexual offenses and crimes within the family, including rape and sexual assault, sex crimes against children, child battery, domestic violence, and family homicide. Part V discusses the psychological dynamics of a variety of common crimes, such as stalking and harassment, theft and robbery, gang violence, organized crime, arson, hate crimes, victimology, the psychology of corrections, and the death penalty. Each chapter contains explanatory tables and sidebars that illustrate the chapter's main topic with examples from real-life cases and the media, and explore controversies surrounding particular issues in criminal psychology, such as criminal profiling, sexual predator laws, dealing with children who kill, psychotherapy with incarcerated offenders, and the use of "designer defenses" in court. Grounded in thorough scholarship and written in a crisp, engaging style, this volume is the definitive handbook and reference source for forensic psychologists, mental health practitioners, attorneys, judges, law enforcement professionals, and military personnel. It will also serve as an authoritative core text for courses in forensic psychology, criminology, and criminal justice practice.

Remorse and Criminal Justice - Steven Tudor 2021-11-29

This multi-disciplinary collection brings together original contributions to present the best of current thinking about the nature and place of remorse in the context of criminal justice. Despite the widespread and long-standing nature of interest in offender remorse, the topic has until recently been peripheral in academic studies. The authors are scholars from North America, the United Kingdom, Europe, South Africa and Australia, from diverse academic disciplines. They reflect on the role of remorse in law, for better or for worse; on how expressions of remorse are affected by the legal contexts in which they arise; and on the impact of these expressions on the individual, the court and the community. The work is divided into four parts - Part I Judging Remorse addresses issues concerning the task of assessing remorse in the courtroom, usually prior to determining sentence. Part II Remorse Beyond the Courtroom explores the place and significance of remorse in various post-court settings. Part III Remorse, War and Social Trauma addresses remorse in the context of political violence and social trauma in the former Yugoslavia and South Africa. Finally, Part IV Reflections seeks to underscore the multi-disciplinary and inter-disciplinary nature of the collection as a whole, through personal and disciplinary reflections on remorse. The work provides a showcase for how diverse academic disciplines can be brought together through a focus on a common topic. As such, the collection will become a standard reference work for further research across a range of disciplines and promote inter-disciplinary dialogue.

Crime and Criminality - Sandie Taylor 2015-12-22

The question of 'why' and 'how' certain individuals are drawn towards behaving in a way that contravenes the 'Law of the Land' is not an easy one to address. Researchers from various different fields have nevertheless attempted to develop theoretical explanations for the existence of different types of crime and why some individuals commit such acts. *Crime and Criminality* draws on criminology, sociology, psychology and neuroscience to offer a balanced perspective of crime, the criminal and criminality. Coverage includes: a comprehensive discussion of theoretical approaches to criminal behaviour, including biological, social and 'rational choice' approaches; an analysis of legal and social definitions of crime and how these definitions influence the way specific behaviours are labelled as criminal; an examination of different types of crime and criminals, from delinquents to 'psychopaths' and sex offenders; an exploration of different ways in which crime is predicted, including risk assessment and offender profiling and an overview of investigative techniques. Addressing a broad range of topics and offering a synthesis of competing theoretical explanations of criminality, this book is essential reading for students taking courses in criminology, criminal psychology, criminal behaviour, forensic psychology and psychological criminology.

Sexual Offending - Patrick Lussier 2018-04-17

There is growing recognition that sexual offending is a multi-determined phenomenon requiring a multi-disciplinary perspective. The significant contribution of psychology and psychiatry, but also sociology, gender studies and anthropology to the study of sex offending and perpetrators of sex offenses has played a key role in the development of a distinct field of research. In recent years, however, there has been an increase in criminological research on the topic, introducing criminological theory and concepts, scientific evidence and observations, and new methodologies to the field. This book brings together international leading scholars to consider key topics on sex offending and, where possible, compare and contrast criminological viewpoints with those of other disciplines, such as psychology and psychiatry. This book considers the following questions: Are the key explanatory factors of sex offenses completely distinct and different from those of non-sex crime and delinquency? Are current models explaining adult sex offending also applicable to explain sex crimes on college campuses, female sex offending, sexual exploitation, sexual homicide, or child luring over the internet? Are today's youth involved in sex offenses tomorrow's adult perpetrators of sex crimes? What is the risk of sexual recidivism and are risk assessment tools effective to identify individuals at-risk of committing another sex crime in the future? Are current legal measures used to prevent sex crimes effective? What are the known effects of such measures? What are the issues and challenges related to the criminal investigation of sex offenses? This book is essential reading for students and researchers from disciplines such as criminology, psychiatry, psychology, sexology, social work and sociology, as well as criminal justice professionals and practitioners such as police investigators, prosecutors, judges, probation/parole officers, and treatment providers/counsellors involved with individuals having perpetrated sex offenses.

The Domestic Assault of Women - Donald G. Dutton 2011-11-01

The Domestic Assault of Women relates social and criminal justice policy to empirically tested social psychological theory about the causes and effects of wife assault. Donald G. Dutton argues that only by understanding the psychology of both the aggressors and the victims of wife assault can we generate informed social and criminal justice policy. By linking the psychological factors that support assaultive habits to police arrest policy and subsequent treatment, Dutton shows how police/therapist intervention can interrupt assaultive behaviour and prevent recidivism.

Criminal Trajectories - David M. Day 2019-07-23

An exploration of criminal trajectories, placing them in a developmental context Over the past several years, notions of developmental trajectories—particularly criminal trajectories—have taken hold as important areas of investigation for researchers interested in the longitudinal study of crime. This accessible volume presents the first full-length overview of criminal trajectories as a concept and methodology and makes the case for a developmental approach to the topic. The volume shows how a developmental perspective is important from a practical standpoint, helping to inform the design of prevention and early intervention programs to forestall the onset of antisocial and criminal activity, particularly when it begins in childhood. Crime in this view does not suit a one-size-fits-all model. There are different types of criminals who develop as the result of different types of developmental factors and experiences. By considering what risk factors may set the stage for later crimes in certain circumstances, the authors argue that we may be able to intervene at any point along the life course and, if addressed early enough, prevent criminal behavior from taking root. *Criminal Trajectories* offers a comprehensive synthesis of the findings from numerous criminal trajectory studies, presented through a multi-disciplinary lens. It addresses the policy and practice implications of these findings for the criminal justice system—including a critique of current sentencing and incarceration practices—and presents twelve recommendations informed by developmental frameworks for future work.
