Stone in Traditional Architecture - David Campbell 2010

A sweeping overview of traditional stone architecture that graces the landscapes of many nations. Over 220 vivid color photos show buildings ranging from simple stone homes and practical farm buildings to imposing town halls and vaulted cathedrals. Over 120 detailed photos illustrate stone working techniques. The extensive text explains the history, styles, and techniques of the stonemasons' and masons' arts. Also included is a practical, instructional handbook; it teaches the crafts of masonry and stonecutting as they have been practiced across the centuries. This book will be a treasure for the builder, art historian, and anyone with a passion for stone structures. As a teenager in his native Canada, David Campbell spent most of his time in French class dreaming over the pictures of medieval villages in his text. Attracted by the charm of the Old World, he left Canada at the age of twenty to travel in Europe. At the age of twenty-eight, after having completed university studies, he decided to work with his hands as a building restoration craftsman. He managed to learn, through practical experience, the crafts of masonry and traditional stone cutting (with hand tools), which he has practiced for over twenty years in the south of France. The other natural materials - wood and earth, and the vernacular architecture to which they give form - also interest him, and in a trajectory of over thirty years, he has gained experience in working with earth in Morocco and in New Mexico, and with wood in the USA and in Russia. Author/photographer of *WOOD in Traditional Architecture*, he offers us here, with this second book on building with natural materials, the fruit of his travels, his experience, and his observation. *Wood in Traditional Architecture*. David Campbell. See how wood has shaped traditional architecture around the world in a panorama of more than 400 color images. From France to Russia, from Norway to Romania, see landmarks built in traditional architecture of wood, and learn the carpentry techniques of the Old World.

Sister Parish Design - Susan Bartlett Crater 2009-10-27

Comfort is the essential element of a successful interior and the hallmark of the Parish-Hadley style. In *Sister Parish Design*, Libby Cameron, Sister's last protégé, and Susan B. Crater, Sister's granddaughter, explore this aspect and much more in a series of conversations with the leading decorators of today. Sister Parish is the iconic American decorator of her generation. Her use of flowered chintzes and overstuffed armchairs combined with unexpected items, like patchwork quilts and painted furniture, is credited with popularizing what is known as American Country-style during the 1960s. Her passion for bold color and mixed patterns invoked charm, imagination, and a lived-in look to her rooms. Her philosophy was to be unafraid and to put things together because you liked them--not because they matched. Filled with beautifully-rendered watercolor illustrations, *Sister Parish Design* is more than just a stunning book—it is an inspirational resource that all decorating aficionados will want to add to their bookshelf.
