*Policy as Practice* - Patrick Schmidt 2019-11-01

Both in concept and in practice, policy has permeated the deepest recesses of civil society and has had particular impact on the lives of those who are actively connected to the educational process. For music teachers in particular, policy can evoke images of a forbidden environment beyond one's day-to-day duties and responsibilities. Nothing, however, could be farther from the truth. In this book, author Patrick Schmidt offers a variety of ways for K-12 music educators to engage with, analyze, and develop effective

policy. Schmidt first demystifies the notion of policy and the characterization that it is out-of-reach to teachers, before exemplifying how policy, both big-picture policy and policy as a daily encounter enacted at the local level, share many similarities and are indeed co-dependent fragments of the same process. The first provides extensive and detailed contextual information, offering a conceptual vision for how to consider policy in the fast-pace and high-adaptability reality of 21st-century music education environments. The second delivers a practical set of ideas, guidelines, and suggestions specific to music education for a closer and more active interaction with policy, directed at providing 'tools for action' in the daily working lives of music educators. This approach encourages those who are novice to policy as well as those who would like to further explore and participate in policy action to exercise informed influence within their field, community, and school, and ultimately have greater impact in pedagogical, curricular, administrative, and legislative decision-making.

**Urban Music Education** - Kate Fitzpatrick-Harnish 2015-04-09

The prevailing discourse surrounding urban music education suggests the deficit-laden notion that urban school settings are "less than," rather than "different than," their counterparts. Through the lens of contextually-specific teaching, this book provides a counternarrative on urban music education that encourages urban music teachers to focus on the strengths of their students as their primary resource. Through a combination of research-based strategies and practical suggestions from the author's own experience teaching music in urban settings, the book highlights important issues for teachers to consider, such as culturally relevant pedagogy, the "opportunity gap," race, ethnicity, socioeconomic status, musical content, curricular change, music program development, student motivation, and strategies for finding inspiration and support. Throughout the book, the stories of five highly successful urban music teachers are highlighted, providing practical, real-world advice for music teachers across the domains of general, choral, band, and string music teaching. Recognizing that the term "urban" can encompass a wide variety of different school and community settings, this book challenges all teachers who work in under-served and under-resourced settings to take a critical look at their own music classroom and work to tailor their pedagogy to meet the particular needs of their students.

**Teaching Epidemiology** - Jorn Olsen 2010-06-25

Teaching epidemiology requires skill and knowledge, combined with a clear teaching strategy and good pedagogic skills. The general advice is simple: if you are not an expert on a topic, try to enrich your background knowledge before you start teaching. Teaching Epidemiology, third edition helps you to do this, and by providing the world-expert teacher's advice on how best to structure teaching gives a unique insight in to what has worked in their hands. The book will help you plan your own tailored teaching program. The book is a guide to new teachers in the field at two levels; those teaching basic courses for undergraduates, and those teaching more advanced courses for students at postgraduate level. Each chapter provides key concepts and a list of key references. Subject specific methodology and disease specific issues (from cancer to genetic epidemiology) are dealt with in details. There is also a focused chapter on the principles and practice of computer-assisted learning.

**The Art of Teaching Art** - Deborah A. Rockman 2000-11-09

Often the finest artists do not make the best teachers. Many frustrated college students of art know this all too well as they suffer through unstructured classes with inexperienced teachers or graduate student instructors. In these situations, it is easy to blame the teachers. But the problem is largely institutional: most students graduating with MFAs from art schools receive little if any instruction in teaching art. If you find yourself in this predicament as teacher or student, this book is for you. The first book to provide a comprehensive guide for teaching college-level art, The Art of Teaching Art is the culmination of respected artist and instructor Deborah Rockman's two decades of teaching experience. Believing that drawing is the backbone of all of the visual arts, she begins with a complete explanation of drawing concepts that apply to any subject matter, e.g., composition, sighting processes, scaling techniques, and methods for linear and tonal development. She then illustrates these concepts with step-by-step methods that easily translate to classroom exercises. Next, she applies the drawing principles to every artist's most important and challenging subject, the human figure. After an extended section on understanding and teaching perspective that explores illusionistic form and space, the focus of the book shifts to the studio classroom

itself and the essential elements that go into making an effective learning environment and curriculum. From preparing materials lists and syllabi, to setting up still-lives, handling difficult classroom situations, critiquing and grading student artworks, and shooting slides of student artworks, she leaves no stone unturned.

Other important educational issues concerned in the teaching of English are discussed: the grammatical variation that differentiates standard and non-standard English; how grammar varies in relation to the purpose and audience of a text; and the different grammatical characteristics of different languages.
