Crisis Communication - Alan Jay Zaremba
2015-05-18

Crises happen. When they do, organizations must learn to effectively communicate with their internal and external stakeholders, as well as the public, in order to salvage their reputation and achieve long-term positive effects. Ineffective communication during times of crisis can indelibly stain an organization's reputation in the eyes of both the public and the members of the organization. The subject of crisis communication has evolved from a public relations paradigm of reactive image control to an examination of both internal and external communication, which requires proactive as well as reactive planning. There are many challenges

in this text, for crisis communication involves more than case analysis; students must examine theories and then apply these principles. This text prepares students by: Providing a theoretical framework for understanding crisis communication Examining the recommendations of academics and practitioners Reviewing cases that required efficient communication during crises Describing the steps and stages for crisis communication planning Crisis Communication is a highly readable blend of theory and practice that provides students with a solid foundation for effective crisis communication.

The Foundations of Communication in Criminal Justice Systems - Daniel Adrian Doss 2014-10-17
Myriad forms of communication occur within the criminal justice system as judges and attorneys speak to juries, law enforcement officers interact with the public, and the news media presents stories of events in courtrooms. Hindrances abound, however. Law enforcement officers and justice system personnel often encounter challenges that affect their ability to communicate with others, ranging from language barriers, to conflicting accounts of

witnessed events, to errors caused by malfunctioning technology. Examining the relevancy of the U.S. Constitution to modern communications, *The Foundations of Communication in Criminal Justice Systems* demonstrates how information is conveyed from multiple perspectives in a range of scenarios, enabling readers to see how these matters relate to and affect the criminal justice system. Topics covered include: How to use the communications process within the justice system from the crafting of messages through the solicitation of feedback Effective methods for persuading individuals and audiences Federal regulations in the workplace and workplace communications tactics How law enforcement and public safety entities use marketing and advertising to influence the general public How to use multimedia resources when communicating Using multiple communications styles to support effective leadership The book concludes with discussions on innovations in communication

technology, natural language processing, cybernetics, and other emerging concepts. With an emphasis on logical reasoning in communication, the book explores the perspectives of numerous players in the justice system, from patrol officers to attorneys. Supplemented by examples of written communication templates that can be adapted within a law enforcement organization, it provides readers with solid theoretical and applied approaches to the subject matter.

Communication in Organizations - Dave Tofanelli 2012-03-30

The future of business communications is a fully interconnected world where every employee will access, create and use content from anywhere. At the same time, companies want to keep their employees connected anytime or anywhere. Employees are no longer tied to their desktops, and they want the same communications options

on the road or from home that they have in the office. Face-to-face communication is quickly becoming a lost art in this age of e-mail, texting and voicemail. But ultimately, when it comes to engaging an audience or making a compelling sales presentation, business is still driven by personal communication. High technology sets the stage, but speaking face-to-face seals the deal. Lack of communicative ability plagues many corporations, and the professionals that rise to the top are overwhelming those that develop communication approaches that achieve results. But, communicating with influence takes work and requires constant attention. This text will assist you in understanding types of communication, explain how successful communication takes place, and suggest ways of improving communication.

Speaking the Truth in Love - Daniel R. Berger 2007-01-01

Approaching public communication from a liberal arts point of view, *Speaking the Truth in*

Love provides a distinctly Christian perspective of rhetoric. Written and oral rhetoric are interwoven throughout the text. Two foundational ideas control the majority of the text. The first is from Plato's 'Phaedrus' as stated by Paul in Ephesians 4:15, "Speaking the truth in love. The second is from the Apostle Peter in 1 Peter 4:11, "If anyone speaks, he should do it as one speaking the very words of God. The spiritual responsibility of communicating truth in accordance with the nature of God, especially the virtue of love, is an awesome privilege and opportunity. Sound content spoken or written eloquently with charisma will enable words to have a maximum impact. The text is designed to be a culminating learning experience for undergraduate communication programs or as an introductory text for graduate programs involving public communication. Beginning with a philosophy of language, meaning, and interaction, argument is built against secular deconstructive thought where everyone has a

different truth based on language. Alongside philosophy we explore ethics and theology from an evangelical perspective. Following this a brief history outlines rhetorical thought from pre-testament classics to today. Based upon these ideas we take a closer look at communication theory as it relates to public communication. Finally, the text addresses the practice of both written and oral communication.
