## **Not Forgotten** - George Weigel 2021-01-28

The world is full of interesting people, and it has been George Weigel's good fortune to have known many such personalities in a variety of fields: politics, religion, the arts and sciences, journalism, the academy, entertainment, and sports. In this collection of reminiscences and elegies, the best-selling author of the definitive biography of Pope Saint John Paul II remembers these men and women from inside the convictions that formed them. Whether he is sketching the lives of Nobel Prize-winning scientists, major league baseball managers, princes of the Church, television personalities, or history-making political leaders, Weigel tries to understand, and help readers understand, the deep truths of the human condition illuminated by each of these not-forgotten lives. Written with verve, insight, and an appreciation for the consequential lives that have touched his own, Not Forgotten fills out the autobiographical portrait that George Weigel began painting in *Lessons in Hope: My Unexpected Life with Saint John Paul II*, while offering a backstage view of some of the men and women who have shaped the turbulent history of our times.

## Orientalism - Edward W. Said 2014-10-01

More than three decades after its first publication, Edward Said's groundbreaking critique of the West's historical, cultural, and political perceptions of the East has become a modern classic. In this wide-ranging, intellectually vigorous study, Said traces the origins of "orientalism" to the centuries-long period during which Europe dominated the Middle and Near East and, from its position of power, defined "the orient" simply as "other than" the occident. This entrenched view continues to dominate western ideas and, because it does not allow the East to represent itself, prevents true understanding. Essential, and still eye-opening, Orientalism remains one of the most important books written about our divided world.

The thing that's kept her going: winning valedictorian. Her only rival: prom queen Shara Wheeler, the principal's perfect progeny. But a month before graduation, Shara kisses Chloe and vanishes. On a furious hunt for answers, Chloe discovers she's not the only one Shara kissed. There's also Smith, Shara's longtime quarterback sweetheart, and Rory, Shara's bad boy neighbor with a crush. **Exploring Universal Basic Income** - Ugo Gentilini 2019-11-25

How do we know, and what don't we know, about its performance? What does it take to implement it in practice? Drawing from global evidence, literature, and survey data, this volume provides a framework to elucidate issues and trade-offs in UBI with a view to help inform choices around its

appropriateness and feasibility in different contexts. Specifically, the book examines how UBI differs from or complements other social assistance programs in terms of objectives, coverage, incidence, adequacy, incentives, effects on poverty and inequality, financing, political economy, and implementation. It also reviews past and current country experiences, surveys the full range of existing policy proposals, provides original results from micro-tax benefit simulations, and sets out a range of considerations around the analytics and practice of UBI. *The Information Economy* - Marc Uri Porat 1977

**Who Needs Migrant Workers?** - Martin Ruhs 2012-05-17

Are migrant workers needed to 'do the jobs that locals will not do' or are they simply a more exploitable labour force? Do they have a better 'work ethic' or are they less able to complain? Is migrant labour the solution to 'skills shortages' or actually part of the problem? This book provides a comprehensive framework for analysing the demand for migrant workers in high-income countries. It demonstrates how a wide range of government policies, often unrelated to migration, contribute to creating a growing demand for migrant labour. This demand can persist even during economic downturns. The book includes quantitative and qualitative analyses of the changing role of migrants in the UK economy. The empirical chapters include in-depth examinations of the nature of staff shortages and the use of migrant workers in six sectors: health; social care; hospitality; food production; construction; and financial services. The book's conceptual framework and empirical findings are of importance to academic and policy debates about labour immigration in all high-income countries. The final chapter presents a comparative analysis of research and policy approaches to assessing labour shortages in the UK and the US. It examines the potential lessons of the UK's Migration Advisory Committee (MAC) for current debates about labour shortages and immigration reform in the US. The book will be of significant interest to policy-makers, stakeholders, academics and students.
